ENGLISH

SECURITY FEATURES

The family polymer banknotes incorporates advanced security features to help protect the currency against counterfeiting. The polymer notes still retain many of the original design elements of paper banknotes. Please take a moment to familiarise yourself with the security features detailed below.

1 COMPLEX CLEAR WINDOW
Complex window design incorporating a white shell vignette.

5 OFFSET
Complex background security patterns in multiple rainbow print.

9 SERIAL NUMBERS
Red horizontal serial number fluoresces red and black vertical serial number fluoresces green under ultraviolet light.

2 SHADOW IMAGE
Shadow image of the logo of Reserve Bank of Vanuatu, visible when the banknote is raised to the light.

6 INTAGLIO
Multicolour raised keyline printing of main design elements on front and back of the banknote.

10 SIGNATURE
Signatures fluoresce under ultraviolet light.

3 G-Switch™
Multiple dynamic optical feature that changes colour when the banknote is tilted under a light source.

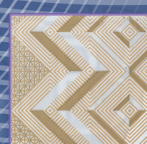

7 MICROPRINT
«VATU 2000/VATU 1000/ VATU 200», repeated in geometric line work visible under magnification.

11 FLUORESCENT PATCH
Machine readable fluorescing patch on front of the banknote with the reversed out «2000/1000/ 200» numeral.

4 EMBOSS
«VT 2000/VATU 1000/ VT 200» is embossed inside a traditional triangle pattern in the large clear window.

8 SEE THROUGH FEATURE
Geometric pattern on front and back of the banknote line up in perfect registration when held up to the light.

12 BLIND MARK
Tactile feature for the visually impaired, identifying value.
