R	=	Revised by Source

1. EXECUTIVE SUMMARY

Global growth is projected to slow further to 2.8 percent in 2023, reflecting subdued growth in advanced economies. Global inflation remains high and major central banks continue to tighten monetary policies to counteract the impact of rising inflation. Global trade is expected to ease owing to expected slow down in global demand.

Domestic economic activities eased during the March quarter, particularly in the agriculture sector, owing to the impacts of two cyclones in March and the persistent increase in inflation. Growth in the services and industry sectors were moderate and projected to drive overall growth during the quarter. Partial indicators of domestic consumption and investment have also slowed. The domestic demand for labour has risen consistently, while the stock of seasonal workers in Australia and New Zealand continued to increase. Annual inflation continued to remain well above the RBV inflation target band.

The Central Government operated a fiscal surplus in the first three months of 2023, as revenue collections remained adequate. However, total revenue outturn were lower compared to same period in 2022.

Money growth moderated during the first three months of the 2023, reflecting slow growth in net foreign assets. Annual money growth was driven by domestic credit. The level of excess reserves remained high, although it declined quarter-on-quarter due to the increase in outstanding RBV notes.

The domestic banking industry's financial performance remained satisfactory despite being heavily challenged by the recent pandemic. The industry remained well capitalized and highly liquid, although increase in non performing loans remained a challenge. However, 86 percent of loans remained as performing loans. Similarly, the international banking industry remained well capitalized, and total solvency margin of the insurance sector was maintained at a satisfactory level.

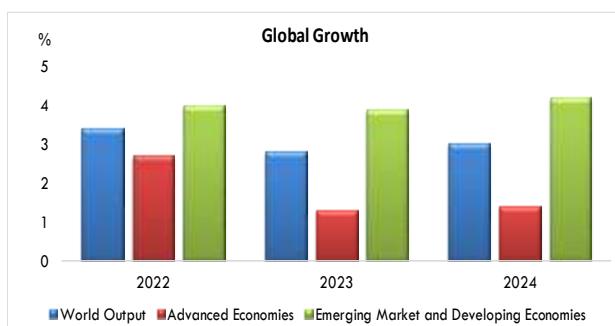

Vanuatu's current account balance (CAB) improved due to a further reduction in the CAB deficit. This favorable trend reflected improvements in trade in goods and services, income balances and financial account, while the capital account balance declined. Foreign reserves remained adequate and sufficient to finance 9 months of imports.

2. THE INTERNATIONAL ECONOMY

The World GDP Growth

Global growth¹ is projected to slow further to 2.8 percent in 2023, relative to 3.4 percent in 2022, before increasing to 3.0 percent in 2024. The slowdown was mainly driven by advanced economies. Inflation remained high but is expected to ease in 2023 owing to lower commodity prices. Global trade is expected to ease in 2023 reflecting the slowdown in global demand.

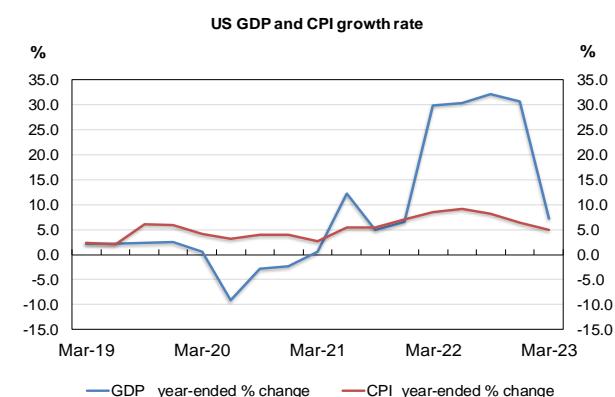

Figure 1: World GDP Growth
(Percentage Change; Annual Data)

Source: IMF WEO, April 2023

The US economy grew at an annual rate of 2.0 percent in the first quarter of 2023² in comparison to a 2.6 percent growth over the December quarter 2022. The increase over the period reflected increased consumer spending and exports. Inflation eased to 5.0 percent over the March quarter from 6.5 percent in the December quarter. In its monetary policy meeting in March 2023, the Federal Reserve raised its federal funds rate to 5 percent from 4.5 percent in December as it continued to pursue its monetary policy objectives.

¹ International Monetary Fund's (IMF) April World Economic Outlook (WEO)

The Euro area economy shrank to 1.1 percent over the March quarter from 1.8 percent in the December quarter; owing to reductions in both private and public consumption. Inflation eased to 6.9 percent in March 2023, from 9.2 percent recorded in December 2022, reflecting the reductions in energy prices. During its monetary policy meeting in March, the European Central Bank (ECB) continued its objective of returning inflation to within its target and raised its three key interest rates (on its main refinancing operations, marginal lending facility and deposit facility) by 50 basis points to 3.5 percent, 3.75 percent and 3 percent, respectively.

Figure 3 : Euro Area GDP and CPI
(Percentage Change; Annual Data)

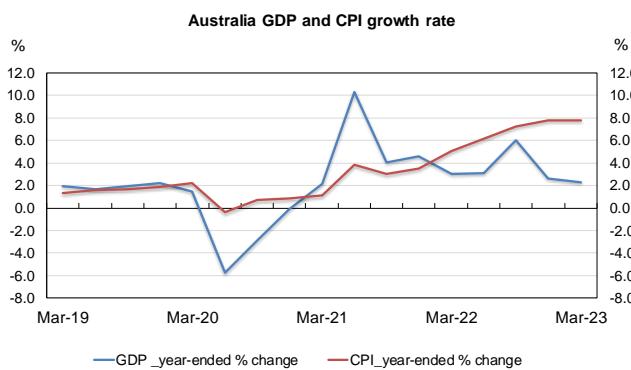

Source: Euro Stats

Growth in Australia rose by a marginal 0.2 percent over the March quarter 2023, compared to 0.6 percent in the December quarter 2022; reflecting subdued domestic demand. Over the year to the March quarter 2023, the economy grew by 2.3 percent in comparison to 2.7 percent over the year to the December quarter 2022. Inflation slowed to 7.0 percent over the March quarter from 7.8 percent over the December quarter, driven mainly by reduction of goods inflation as opposed to an increase in services inflation. During its monetary policy meeting in early March 2023, the Reserve Bank of Australia (RBA) increased its official cash rate by 25 basis points to 3.6 percent, from 3.1 percent in December 2022.

² Third estimate of the US Bureau of Economic Analysis (BEA)

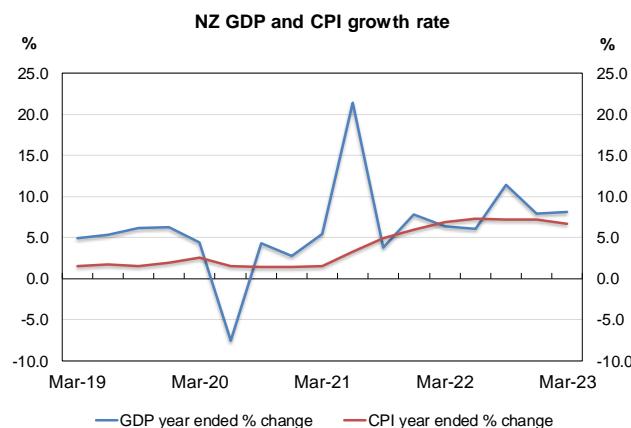

Figure 4 : Australia GDP and CPI
(Percentage Change; Annual Data)

Sources: Reserve Bank of Australia, Australia Bureau of Statistics

The New Zealand economy declined by 0.1 percent and 0.7 percent, in the March quarter 2023 and the December quarter 2022, respectively. Over the year to March 2023, the economy grew by 2.2 percent in comparison to 2.3 percent over the year to December 2022. Inflation increased to 6.7 percent over the year to March 2023, from a 7.2 percent increase recorded in December 2022. The Reserve Bank of New Zealand (RBNZ) raised its official cash rate (OCR) from 4.25 percent to 4.75 percent during its February 2023 meeting as it seeks to return inflation to its target range over the medium term.

Figure 5: New Zealand GDP and CPI
(Percentage Change; Annual Data)

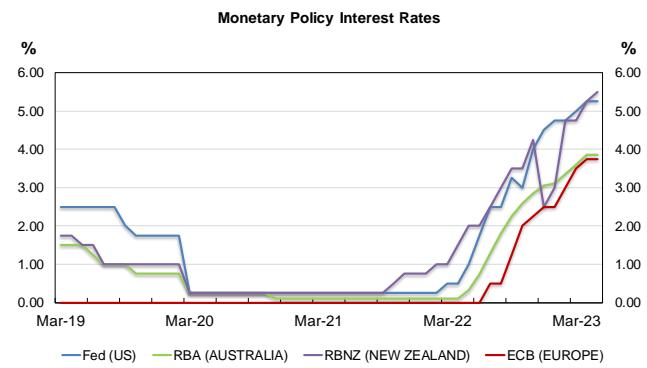

Sources: Reserve Bank of New Zealand, NZ Stats

Key Policy Interest Rates

Economic performance in Vanuatu's major trading partners has weakened somewhat over the March quarter 2023, compared to the December quarter

2022. This reflected tighter financial conditions implemented by central banks in the trading partner economies to counteract rising inflation, which affected both consumption and investment activities.

Figure 6 : Key Interest Rates
(Percent; Monthly Data)

Sources: ECB, Fed, RBA, RBNZ

Commodity prices

Global commodity prices have eased from the previous year levels. Accordingly, the IMF all commodity primary index and the energy price index declined by 13.1 percent and 28 percent, respectively over the March quarter.

3. DOMESTIC ECONOMIC DEVELOPMENTS

3.1 REAL ECONOMY

Domestic economic activity is estimated to have eased slightly during the March quarter owing to the damages caused by the twin cyclones in Shefa and Tafea provinces and persistent acceleration in inflation.

Agriculture, Fisheries and Forestry Sectors

The agriculture, fisheries and forestry sector is prone to the impact of natural disasters and climate change. Growth was severely affected by the twin cyclones in early March 2023, with significant destruction of crop production and negative growth prospects for this sector.

Services Sector

Growth prospects in the retail trade³ remained moderate, inline with a decline of 38 percent in imports of food and drinks during the current quarter. Though growth remained relatively higher by 40 percent over the same period of the previous year.

³ One of the largest components of the services sector.
Imports of food and drinks is used as a proxy for retail trade

Transport services remained strong, as reflected in the rise in imports of motor vehicles by 26 percent and 95 percent over the March quarter 2023 and the same period of the previous year, respectively.

Total visitor arrivals expanded by 36.9 percent over the March quarter, but remained lower by 10.8 percent to pre-pandemic levels. The cyclone impact assessment indicated that 62 percent⁴ of all tourism accommodation providers in Vanuatu were back to fully operational during the aftermath of the dual cyclones in early March 2023. This indicated a level of operational resilience. In addition, the resumption in operations of foreign airlines such as Fiji Airways and Solomon Airlines is expected to give overall tourism arrivals a boost going forward. Marketing and new tourism products promotion undertaken by the Vanuatu Tourism Office (VTO) will also help raise demand.

Industry Sector

The construction sub-sector, which has a relatively large weight in the industry sector, is projected to grow at a slower pace amidst acceleration in the level of inflation. Imports of cement, iron and steel declined by 48 percent and 15 percent over the quarter and the same period of the previous year. Major construction projects within the country which has driven construction activities such as the South Santo, Pentecost, Malekula and Tanna roads, the Sarakata hydro project, and the Vanuatu Inter-island shipping project have continued into the March quarter.

In the manufacturing sector, electricity production increased by 9.1 percent and 16 percent in the March quarter 2023 and the same period of last year, respectively. According to the Utilities Regulatory Authority (URA), a total of 22 53 4299 kilowatts was produced over the quarter compared to 20 653 594 kilowatt in the previous quarter.

Consumption

Partial indicators of domestic consumption revealed downward trends in the current quarter, but remained positive over the year. Commercial banks' lending for personal consumption fell by 1.2 percent quarter-on-quarter but rose by 0.8 percent year-on-year. Value-added Tax (VAT) showed a quarterly decline of 3.0 percent but rose by 36.3 percent over the year to March 2023. Energy consumption declined by 5.0 percent over the quarter, though increased by 5.0 percent relative to the previous year. The annual uptrend reflected pickup in domestic demand as the economy continues to recover.

⁴ https://www.dailypost.vu/news/vanuatu-rapid-tourism-impact-assessment-completed/article_275647f1-778a-5488-a823-9022ecbc3790.html

Investment

Partial indicators in investment mirrored the trend in domestic consumption, registering a negative quarterly growth relative to a positive year-on-year growth. Commercial banks' credit to businesses declined by 3.7 percent quarter-on-quarter but grew by 2.4 percent year-on-year. In private investment, growth in commercial banks' lending for housing and land purchases slightly declined by 0.4 percent over the quarter but rose by 2.6 percent over the year to March 2023. The annual uptrend in investment reflected the resumption of tourists and non-tourists related business activities, following the re-opening of borders in the second half of 2022.

Labour Market

In labor market development, the number of job advertisements showed quarterly and annual increases of 18 percent and 157 percent, respectively. The increase in demand for workers was more pronounced in the private sector with more than 60 percent of the total vacancies and less than 40 percent from the public sector given the relative sizes of the two sectors. In addition, the total stock of seasonal labor workers in both Australia and New Zealand rose by approximately 11 percent over the quarter.

Figure 7 : Number of Job Advertisements (Quarterly Level)

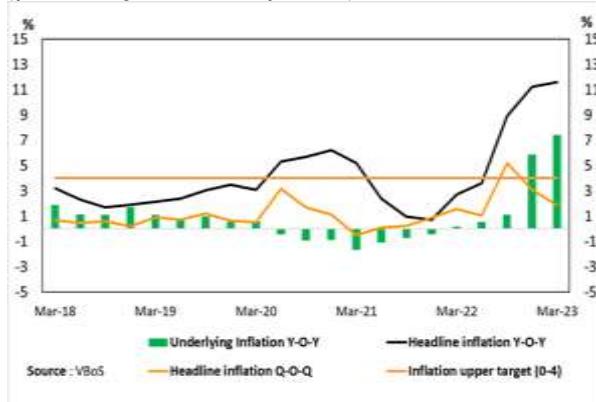

Inflation⁵

Annual headline inflation exceeded the RBV's internal target band of 0-4 percent during the March quarter 2023, registering 11.6 percent during the March quarter 2023 relative to 11.2 percent and 8.9 percent in the December and September quarters of 2022, respectively. The price hike reflected both domestic and external factors such as; supply chain constraints due to the impacts of the cyclones, cut in oil

⁵ Based on the revised weights in the consumer price index (CPI) basket by the Vanuatu Bureau of Statistics.

production by OPEC⁶, the strengthening of USD and high shipping costs. Underlying inflation rose by 7.4 percent in the March quarter of 2023 relative to 5.9 percent in the last quarter of 2022. These upward movements implied that overall domestic prices in Vanuatu have increased relative to the previous year.

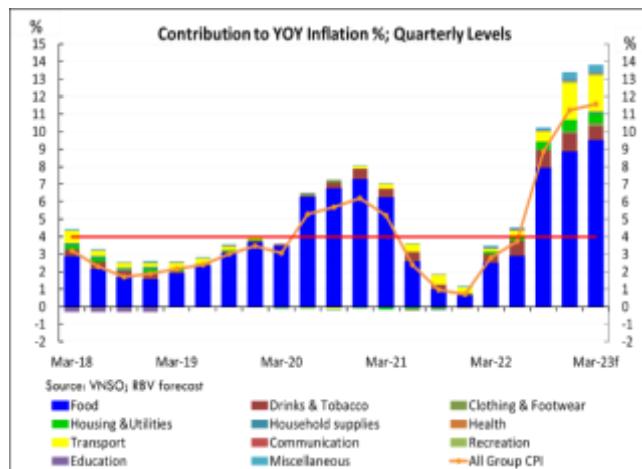

Figure 8: Consumer Price Inflation
(percentage; Quarterly Data)

On a quarter-on-quarter basis, headline inflation rose by 1.9 percent in March 2023, relative to increases of 3.1 percent and 1.6 percent in the December quarter and the same quarter of 2022, respectively. The main drivers to the quarter-on-quarter inflation were: health (+9.2%), reflecting a rise in price of diagnostic services; household supplies, clothing and footwear (+4.1%), driven by increasing prices of household appliances and men, women and children's clothing; food (+3.3%), due to pick up in prices of fruits, vegetables, bread and cereal products; drinks and tobacco (+1.2%), reflecting high prices of alcohol.

The main categories contributing to the year-on-year inflation were; health (+20.1%), food (+16.6%), transport (14.5%), miscellaneous (+14.3), recreation (+11.7%), drinks and tobacco (+6.1%), housing and utilities (+6.0%) and household supplies (+3.4%). Similar, to the quarter-on-quarter trend, the surge in prices relative to March 2022, reflected escalated prices for health diagnostic services, root crops, fruits and vegetables, personal care products, personal accessories, audio and visual computing, alcohol beverages, fuel prices and household appliances, utensil and tools.

Figure 9: Contributions to Annual CPI inflation
(percentage, Quarterly levels)

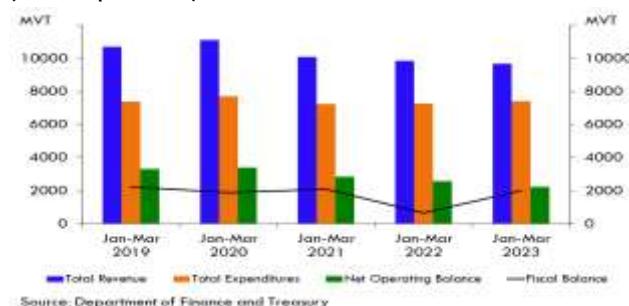

On another development, the Vanuatu Bureau of Statistics (VBOS) implemented the revised weights in the Vanuatu's consumer price index (CPI) during the March quarter 2023. The implementation of the new weights have not had any significant contribution to the hike in prices during the March 2023 quarter. Annual inflation remained at 11.6 percent using both the old and revised weights.

3.2 FISCAL DEVELOPMENTS

The Central Government operated a fiscal surplus in the first three months of 2023, owing to adequate revenue collections. The uptrend in revenue performance reflected increases in recurrent revenues and inflows of budget support and recovery funds. However, total revenue were lower compared to same period in 2022. Owing to a delay in the 2023 budget approval by Parliament, total expenses were maintained at the same level as in 2022. This is due to the impact of the supply bill⁷ on expenditure in the first three months of 2023.

Figure 10: Fiscal Operation
(Jan-Sep Levels)

⁶ Organization of the Petroleum Exporting Countries. The Organization comprises of 15 member countries which produced about 40 percent of world's crude oil and have more than 80 percent of the world's oil reserves.

⁷ Supply bill enacted by Parliament as supplementary appropriation for first three months of 2023; as the 2023 budget appropriations were only approved by Parliament in March 2023. The bill stated that expenditures for first three months of 2023 were to be in line with 2022 appropriations.

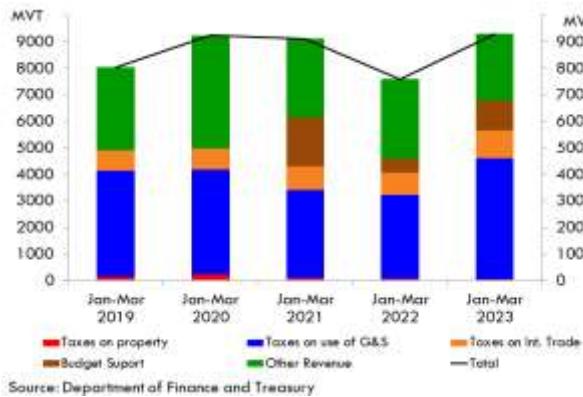

Total revenue⁸ recorded VT9,669.2 million from January to March 2023, lower by 1.7 percent compared to January to March 2022. On the other hand, total expenses increased by 2.2 percent from the same period in 2022, to reach VT7,429.1 million.

Total revenue declined from the same period in 2022 but remained higher relative to total expenses. This resulted in a net operating surplus of VT2,240.1 million incurred during the quarter. Netting out VT227.9 million in net acquisition of non-financial assets, led to an overall fiscal surplus of VT2,012.2 million in March 2023.

RECURRENT REVENUE

Recurrent revenue performed well in the first three months of 2023, reaching VT9,301.6 million, an increase of 22.6 percent relative to same period of 2022. This uptrend reflected high budget support and recovery efforts associated with the twin cyclones in March, higher collections for taxes on goods and services and taxes on international trade and transactions⁹. On the other hand, taxes on property and other revenue declined compared to the same period in 2022. The slowdown in other revenue reflected the continuing slowdown in fees from the citizenship by investment program. This is associated with suspension of the EU visa agreement waivers.

Figure 11: Recurrent Revenue
(Jan-Sep Levels)

Taxes on the use of goods and services¹⁰ amounted to VT4,556.8 million from January to March 2023, higher by 43.9 percent relative to January to March of 2022.

⁸ Includes recurrent and development budget

⁹ Import and export duties

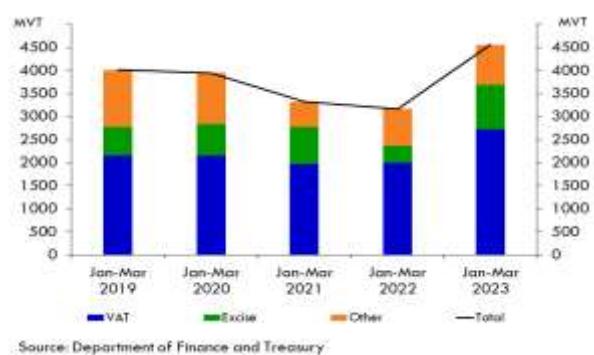

¹⁰ Comprises of Value Added Tax (VAT), Excise Tax and taxes under the category 'Others'

¹¹ Major source of Government revenue

¹² In November 2021 Parliament approved a number of excise tax

The increase was attributed to robust growths recorded for VAT¹¹ and excise taxes; offsetting the decline in other taxes. VAT recorded VT2,722.8 million, higher by 36.3 percent relative to the same period of 2022. The upward trend in VAT reflected improved compliance measures by the authorities, business recovery associated with the reopening of international borders and higher domestic consumption relating to the immediate response and recovery efforts associated with the cyclones. Furthermore, excise taxes rose significantly by 159 percent to reach VT962 million. This reflected the full effect of the excise tax amendments at the end of 2021¹².

Figure 12: Taxes on use of Goods and Services
(Jan-Sep Levels)

Taxes on international trade and transactions¹³ also rose by 24.6 percent relative to the first three months of 2022, to record VT1,033.2 million.

In contrast, taxes on property reached VT54.4 million in the first three months of 2023; a decline of 9.0 percent relative to same period in 2022.

Other Revenue¹⁴ recorded VT2,529.3 million from January to March 2023; lower by 15.1 percent from the same period of 2022. This downturn reflected continuing reduction in revenue collections from the citizenship by investment programs in the beginning of 2023.

The government received VT1,127.9 million worth of budget support in the first three months of 2023. This amount was received in March 2023 as part of the TC Judy and Kevin recovery support from the World Bank, and was significantly higher by 103.4 percent from the first three months in 2022.

amendments: (a) Increase in excise tax on cigarettes from 16vt/stk to 25vt/stk and novel tobacco/nicotine products excise rate to 4,000vt/kg. b)and a new excise rate of 20 VT/kg was applied to poultry products.

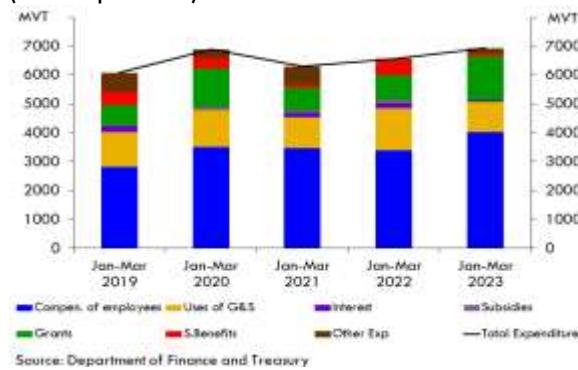

¹³ Constitute import and export duties

¹⁴ Constituting fees and charges, approximately 80% of this is the honorary citizenship program fees (Vanuatu Contribution Program (VCP) and Vanuatu Development support program (VDSP)).

RECURRENT EXPENDITURE

Recurrent expenses recorded VT6,927.9 million from January to March 2023, higher by 5.7 percent from the same period of 2022. Higher spending items included: compensation of employees, grant to grant bodies and other expenditures. In contrast, lower spending was recorded for use of goods and services, interest payments, subsidies and social benefits.

**Figure 13: Recurrent Expenditure
(Jan-Sep Levels)**

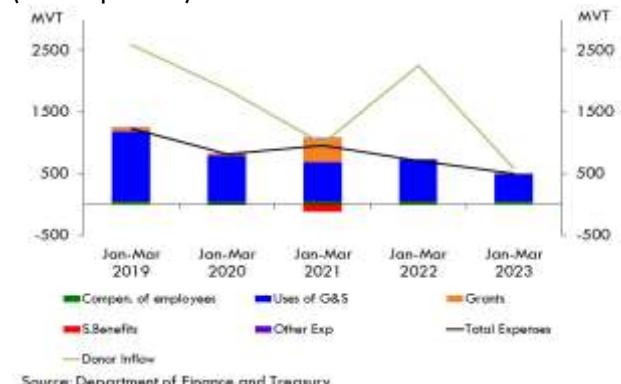

RECURRENT FISCAL BALANCE

A net operating surplus of VT2,373.6 million was achieved in March 2023. Financing, the value of VT (69) million in net acquisition of non-financial assets from this balance, resulted in a recurrent fiscal surplus of VT2,443.0 million for the first three months of 2023.

DEVELOPMENT BUDGET

Total project grants¹⁵ received from donor partners recorded VT594 million in January to March 2023. It was lower by 73.6 percent from the same period of 2022. Similarly, project grant expenses fell by 29.7 percent relative to the first three months of 2022, to reach VT501.2 million.

**Figure 14: Donor Financing
(Jan-Sep Level)**

Project grants exceeded expenses and a net operating surplus of VT93.0 million was realized in March 2023. Financing the value of VT297 million in net acquisition of non-financial assets led to a fiscal deficit of VT204 million under donor financing.

FISCAL FINANCING

The central government's net acquisition of financial assets, mainly deposits rose to VT2,334.5 million in the first three months of 2023. This is the level available as reserves after expenditures are met.

Furthermore, net incurrence of liabilities¹⁶ fell to VT 108.3 million in the first three months of 2023. The fall reflected a decline in the overall central government liabilities with both domestic and external creditors by VT8.1 million and VT100.2 million, respectively.

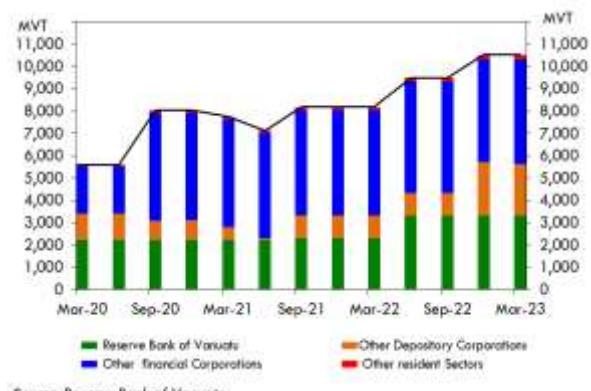

GOVERNMENT BOND MARKET

Total outstanding domestic bond slightly fell to VT10,515 million in the March quarter of 2023, from VT10,523 million recorded in the previous quarter. But it was higher by 28.6 percent relative to the same period of 2022. Of this amount, other financial corporations claimed the largest share of 44.7 percent, followed by the Reserve Bank at 31.6 percent, commercial banks at 21.9 percent and other resident sectors with 1.8 percent.

¹⁵ Only accommodates inflows and outflows of donor project funds recorded by the Government Treasury.

¹⁶ Net incurrence of government liabilities shows the difference between the incurrence and repayment of government debt with both domestic and external creditors.

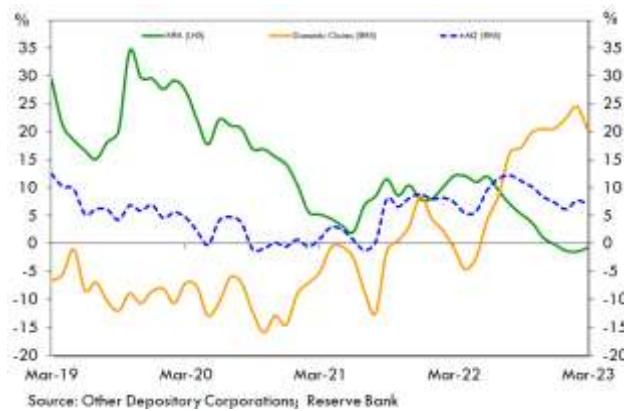

**Figure 15: Outstanding Government Bonds
(Quarterly Level)**

3.3 MONETARY DEVELOPMENTS

Banking sector activities have gradually improved in the first three months of 2023, as reflected in the slight growth in broad money (M2). M2 slightly rose by 0.4 percent and 7.1 percent quarter-on-quarter and year-on-year, respectively to reach VT110,960.7 million. The growth recorded quarter-on-quarter was mainly attributed to the gradual improvement in net foreign assets (NFA), while the year-on-year trend was driven by the robust growth in domestic credit. In terms of its component; the quarter-on-quarter growth was attributed to the increases in both narrow money (M1) and quasi money. Moreover, narrow money remained the main driver for money growth, year-on-year.

**Figure 16: Determinants of Money Supply
(Percentage Change; Year-on-Year Growth)**

The RBV continued to maintain an accommodative monetary policy stance from 2022 and up to the March quarter of 2023. The Bank's policy interest rate remained at 2.25 percent. Similarly, the Statutory Reserve Deposits (SRD) ratio, the Liquid Asset Ratio (LAR) and the Capital Adequacy Ratio (CAR) were

maintained at 5.25 percent, 5.0 percent, and 10.0 percent, respectively. The Bank's Imports Substitution and Export Finance Facility (ISEFF)¹⁷ and the Disaster Reconstruction Credit Facility (DRCF) remained operational. Overall, monetary conditions remained supportive of growth, as reflected by the persistent high level of excess reserves and sound capital position of commercial banks.

In terms of monetary policy, persistent inflation remained the major challenge to achieving macroeconomic stability. The annual inflation has exceeded the Bank's inflation target range of 0-4 percent to record 11.6 percent in the March quarter of 2023. Official foreign reserves recorded VT71,307 million sufficient to cover approximately 9 months of imports. Excess reserves remained adequate at VT33,631.3 million at the end of the reviewed quarter.

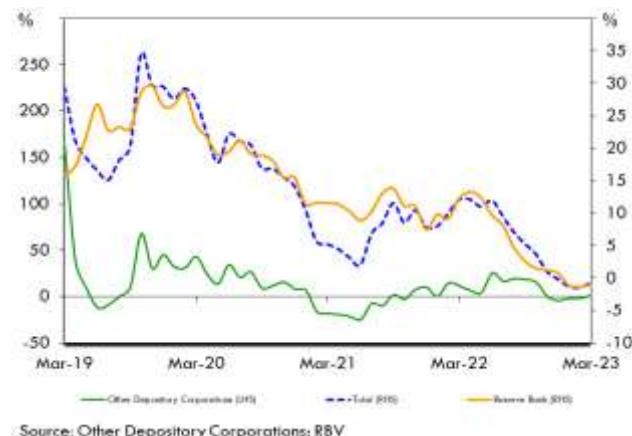

OTHER DEPOSITORY CORPORATION (ODCs)

DETERMINANTS OF MONEY SUPPLY

Net Foreign Assets (NFA)

Growth in net foreign assets slowed though remaining positive at 0.3 percent quarter-on-quarter to VT81,365.9 million. This reflected net inflows of foreign reserves¹⁸ recorded by the Reserve Bank. The bulk of the inflows were funds from the development partners for government related projects and disaster and recovery efforts after the twin cyclones in March 2023. However, external risks remain such as; tight financial conditions and external price shocks posed by geopolitical tensions (Ukraine-Russia War). These risks also attributed to the 0.7 percent contraction in NFA relative to the previous year.

**Figure 17: Net Foreign Assets
(Percentage Change; Year-on-Year Growth)**

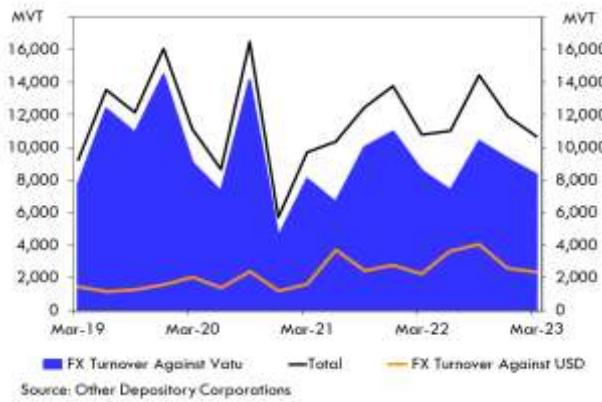

¹⁷ ISEFF is a back-to-back lending facility to businesses offered through commercial banks

¹⁸ For sources of inflows of foreign reserves please refer to section 4.1 balance of payments for detailed information.

Foreign Exchange Turnover¹⁹

Earnings from commercial banks foreign exchange transactions recorded VT10,670.1 million in the current quarter. They were lower by 10.3 percent quarter-on-quarter and 1.1 percent year-on-year. The lower earnings recorded during the quarter were determined by reduction in earnings via trading against both the US Dollar and the local currency (VATU). Similarly, the year-on-year reduction reflected lower earnings via trading against the local currency (VATU). In terms of customers, the downward trend was attributed to decline in earnings recorded from trading via non-resident and other customers. All transactions were carried out in the outright spot and forward markets and none for swap markets. During the reviewed quarter, 78.1 percent of earnings were generated via trading against the local currency (Vatu), while 21.9 percent via trading against the US Dollar.

Figure 18: Foreign Exchange Turnover Position of Domestic Banks
(Millions of VT)

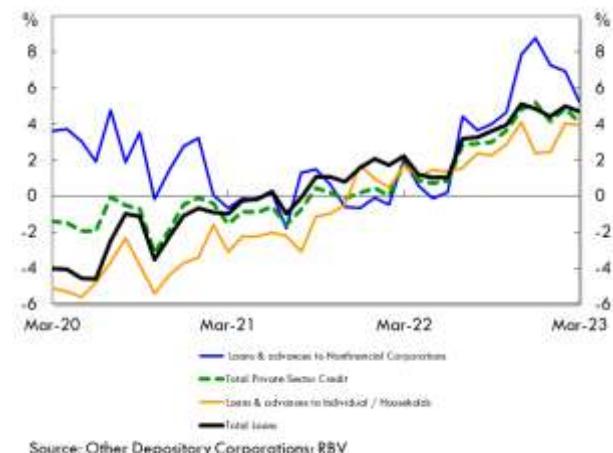

Domestic Claims

Domestic credit fell by 0.4 percent in the reviewed quarter but grew strongly by 22.6 percent year-on-year to reach VT50,280.9 million. Net claims on the central government with the banking system declined during the quarter thus attributed to the downward trend in domestic credit. The annual trend reflected increases in both net claims on the central government and private sector credit.

Private sector credit (PSC)²⁰ rose by 0.3 percent quarter-on-quarter and 4.6 percent, year-on-year to reach VT62,733.8 million. The upward trend in PSC continued to reflect the increasing demand for credit to support the ongoing recovery in the domestic economy.

¹⁹Involves trading in major currencies, such as the Euro, NZD, AUD, GBP and other currencies against the Vatu and the US dollar.

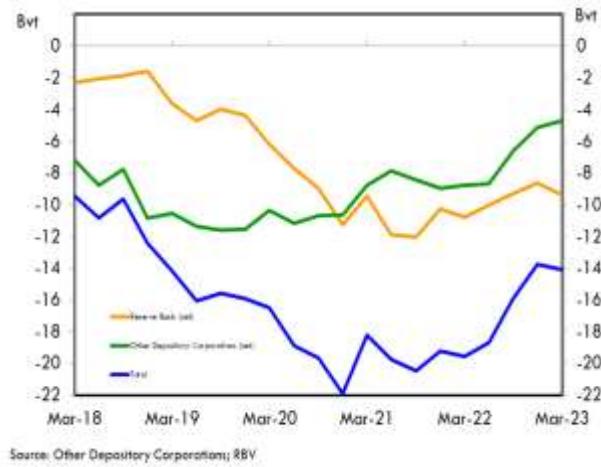

Figure 19: Private Sector Credit
(Year-On-Year Growth; By Categories)

Refer to section 3.4: private sector lending for further developments in lending by economic sectors.

The Central Government's net credit position vis-à-vis the banking system declined by 2.7 percent in the March quarter of 2023. This reflected the accumulation of government deposits held with the Reserve Bank. However, net claims on the central Government rose by 30.7 percent year-on-year as the Government continued to utilise its deposits held with both the Reserve Bank and commercial banks to fund its operation.

Figure 20: Net Claims of the Vanuatu Government Vis-à-vis the Total Banking Sector
(Levels, Billions of VT)

MEASURES OF MONEY SUPPLY

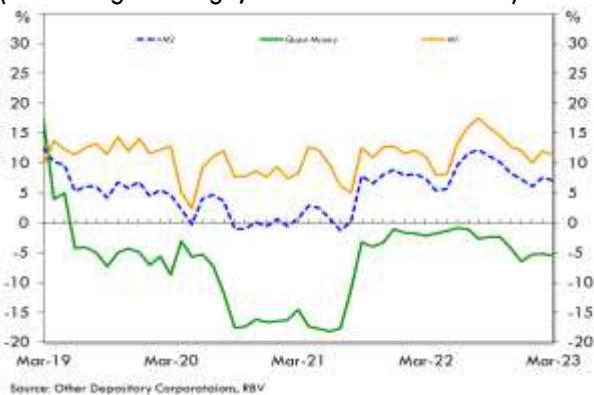

M1 which represents money flow into the economy; grew by 0.5 percent and 11.4 percent quarter-on-quarter and year-on-year, each to reach VT85,995.0

²⁰PSC comprises credit extended to non financial corporations and individual and households

million. The quarter-on-quarter growth was largely driven by transferable deposits; moreover, the upward trend year-on-year was attributed to both currency in circulation and transferable deposits.

Currency in circulation fell by 1.7 percent quarter-on-quarter; to record VT13,317.4 million. This is a normal trend following the seasonally high demand for cash associated with the festive seasons at the end of 2022. It rose by 21.2 percent year-on-year reflecting the high demand for currency to support the recovery in the domestic economy. Transferable deposits increased by 0.9 percent and 9.7 percent quarter-on-quarter and year-on-year, respectively to reach VT72,677.6 million. The following sectors have accumulated their transferable deposits during the quarter; state and local governments, other non-financial corporations and other resident sectors. Similarly, sectors which recorded increases in their transferable deposits year-on-year includes: other financial corporations, state and local government, public non-financial corporations, other non-financial corporations and other resident sectors.

Figure 21: Money Supply Components
(Percentage Change; Year-on-Year Growth)

Quasi-money recorded VT24,965.6 million in the reviewed quarter. This is a slight growth of 0.2 percent quarter-on-quarter. However, this level was lower by 5.5 percent relative to same period in 2022. The sectors which recorded increases in their interest-bearing deposits during the quarter includes; other depository corporations, other financial corporations and other resident sectors.

INTEREST RATES²¹

Interest rates have risen quarter-on-quarter; though still lower relative to the same quarter during the previous year. This is reflected in the widening of the interest

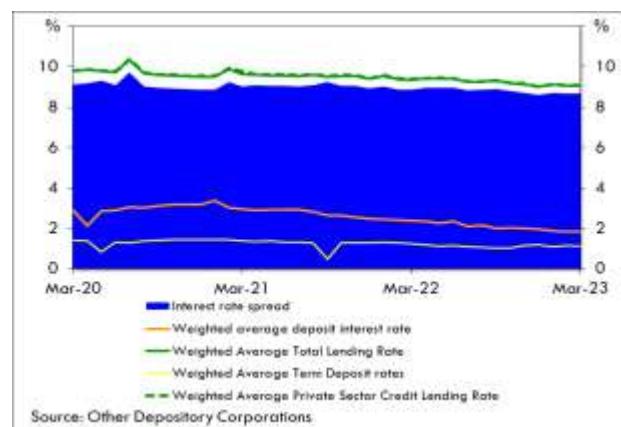

rates spread in the reviewed quarter. However, the current interest rates spread was narrowed compared to the March quarter 2022.

The weighted average interest rates on total deposits remained unchanged at 0.40 percent quarter-on-quarter though decline by 0.11 percentage points year-on-year. The weighted average interest rates on fixed deposit rates fell by 0.04 percentage points and 0.12 percentage points quarter-on-quarter and year-on-year, respectively, to 1.15 percent.

In terms of lending rates, the weighted average interest rates on total loans rose by 0.05 percentage points quarter-on-quarter, but fell by 0.30 percentage points year-on year to 9.07 percent.

The combine effects of the slight increase in weighted average interest rate on total lending and; the unchanging rate on weighted average deposits, resulted in the widening of the interest rate spread by 0.05 percentage points to 8.67 percent. However, interest rates spread remained lower by 0.19 percentage points relative to March quarter of 2022.

Figure 22: Interest Rate
(Percent, Month-End Rates)

MONETARY BASE (M0)

Base money²² fell by 2.0 percent and 2.5 percent quarter-on-quarter and year-on-year, respectively to reach VT55,973.1 million. The downward trend quarter-on-quarter reflected declines in currency in circulation and excess reserves. Similarly, the annual trend continued to reflect the declining level of excess reserves. Details on excess reserves is further explained under money markets development. Similarly, currency in circulation was as previously mentioned²³. SRD rose

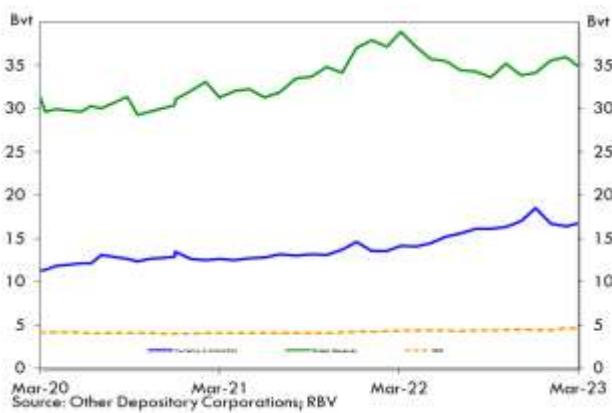

²¹Interest rates in Vanuatu have always been characterised by very high lending rates and low deposits rates.

²²Base Money or 'Reserve Money' is made up of currency in circulation, Statutory Reserve Deposits (SRD), and Excess Reserves.

²³ Refer to currency in circulation under narrow money for more information pg.19

by 0.9 percent and 3.0 percent, quarter-on-quarter and year-on-year, respectively to VT4,493.0 million. This implied that residents increased their deposits with commercial banks during the reviewed quarter and over the year, respectively.

Figure 23: Components of Reserve Money
(Levels; Billions of VT)

OTHER FINANCIAL INSTITUTIONS (OFI)²⁴

Majority of assets held by OFIs depicted downward movement quarter-on-quarter though growth remained positive year-on-year. Net foreign assets (NFA) fell by 0.6 percent to VT965.2 million. However, this level was relatively higher by 108.1 percent compared to same period in 2022 due to accumulation of OFIs' investments abroad. Similarly, deposits with commercial banks fell by 11.5 percent quarter-on-quarter, but rose by 10.3 percent year-on-year to record VT2,771.2 million. Shares and equity fell by 0.1 percent to VT7923.6 million quarter-on-quarter, but growth remained positive at 6.8 percent year-on-year. Demand for credit from OFIs showed persistent decline; as outstanding loans fell by 1.5 percent and 4.7 percent, quarter-on-quarter and year-on-year, respectively to reach VT3,604.0 million. Out of the total loans, other non-financial corporations/businesses grabbed 58 percent of the share of loans, followed by public non-financial corporations at 24 percent and other resident sectors or individuals and households with 19 percent.

The only asset which recorded an increase during the reviewed period was investment in Government bonds; which rose by 2.17 percent, quarter-on-quarter to VT4,700 million. However, this level was consistent to level recorded in March 2022.

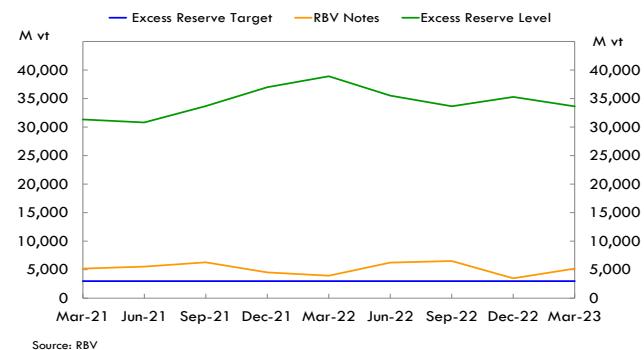

In terms of liabilities; insurance and technical reserves fell by 11.4 percent and 2.1 percent, quarter-on-

quarter and year-on-year, respectively, to record VT26,269.6 million. Similarly, shares and other equity declined by 64.5 percent and 26.9 percent quarter-on-quarter and year-on-year, respectively, to reach VT1,405.7 million. This reflected substantial losses incurred by one of the OFIs during the reviewed quarter. Deposits slightly rose by 0.2 percent quarter-on-quarter, but fell by 26.7 percent year on year, to record VT511.9 million.

MONEY MARKET DEVELOPMENT

Commercial banks' excess reserves decreased to VT33,631.30 million in the first quarter of 2023, from VT35,281.60 million in the final quarter of 2022. This downward trend was largely attributed to the increase in the level of RBV Notes issued.

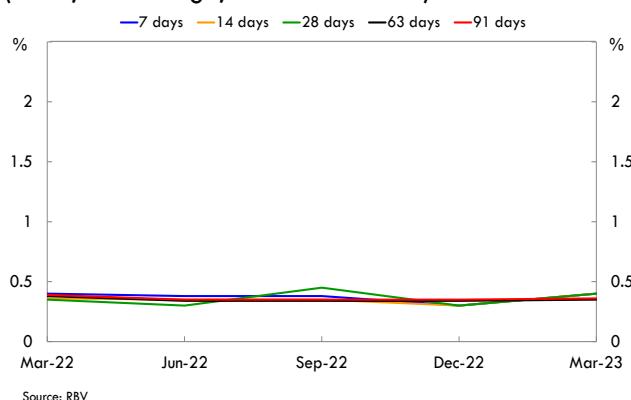

Figure 24a : Bank Excess Reserves
(Levels, Millions of Vatu, Month-End Data)

Total outstanding RBV Notes rose from VT3,496 million in the preceding quarter to VT5,200 million at the end of the first quarter. The Bank floated VT11,100 million in RBV Notes and received a total of VT20,844 million in bids from commercial banks. Out of these bids received a total of VT9,970 million was allotted to the successful bidders. RBV Notes allotments during the review quarter were as follows: VT1,500 million was allotted to the 7 days, VT1,640 million was allotted to the 14 days, VT2,434 million was allotted to the 28 days, VT2,016 million was allotted to the 63 days and VT2,380 million was allotted to the 91 days maturity.

24 Covers Credit Corporation Vanuatu Ltd; Vanuatu Agriculture Bank; and Vanuatu National Provident Fund.

Figure 24b : RBV Notes Yields
(Level, Percentage, Month-End Data)

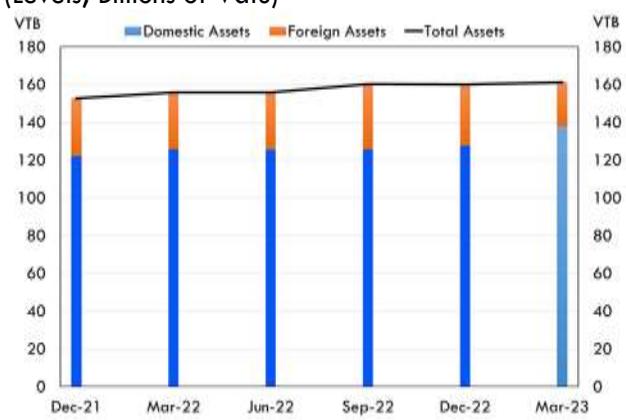

The interest rates on all categories of RBV Notes have increased as shown in figure 24b. The 7 days notes interest rates increased to 0.40% (0.30% previous), 14 days notes interest rates increased to 0.40% (previous 0.30%), 28 days notes interest rates increased to 0.40% (previous 0.30%), 63 days notes interest rates increased to 0.35%, (previous 0.34%) and the 91 days RBV notes interest rate increased to 0.36% (previous 0.35%).

3.4 BANKING SECTOR DEVELOPMENTS

Domestic Banks

Financial Position

Figure 25: Asset Position – Domestic Banks
(Levels; Billions of Vatu)

The domestic banking industry's balance sheet registered both a quarter-on-quarter and a year-on-year growth of 0.7 percent and 3.5 percent respectively, to VT161.2 billion. This largely reflects quarterly increase in total domestic assets by 8.1 percent to VT137.9 billion whilst total foreign assets was reduced by 28.3 percent to VT23.3 billion. Similar movements were noted when compared annually with domestic assets increasing by 9.8 percent and foreign assets decreasing by 22.7 percent.

The decrease in foreign assets was largely attributed to quarter-on-quarter reduction in claims on non-residents and foreign currency cash by 94.0 percent to VT0.6 billion and 2.1 percent to VT1.3 billion respectively, outweighing the 3.4 percent increase in balances due from financial institutions abroad to VT21.4 billion. On an annual basis, increments were witnessed in foreign currency cash and balances due to financial institution abroad by 67.0 percent and 3.6 percent in that order while claims on non-residences saw a drop of 92.8 percent.

Total domestic assets also grew as claims on RBV, private sector and other domestic assets registered quarter-on-quarter inclines of 3.2 percent to VT43.3 billion, 16.3 percent to VT72.4 billion and 4.0 percent to VT14.0 billion respectively. On the other hand, cash (VUV), claims on central government, other local government, financial institutions and non-financial institutions declined by 23.3 percent to VT3.8 billion, 4.6 percent to VT2.7 billion, 3.0 percent to VT24.7 million, 70.6 percent to VT148.6 million and 1.3 percent to VT1.6 billion correspondingly. Year-on-year, apart from claims on RBV, other local government and claims on financial institutions which decreased by 4.1 percent, 14.0 percent and 87.6 percent respectively, all else increased: cash (VUV) by 20.1 percent, claims on central government by 21.6 percent, non-financial institutions by 16.2 percent, private sector by 21.1 percent, and other domestic assets by 9.8 percent.

The domestic assets of the banking industry are comprised of claims on private sector (44.9 percent), claims on RBV (26.9 percent), other domestic assets (8.7 percent), cash (VUV) (2.4 percent), claims on central government (1.7 percent), claims on non-financial institution (1.0 percent), claims on financial institution (0.1) and claims on other local government (0.02 percent).

Capital Adequacy

The domestic banking industry remained well capitalized with a capital adequacy ratio (CAR) of 24.6 percent (23.1 percent: Dec-22 and 23.3 percent: Mar-22) at the end of the reviewed quarter which is well above the minimum threshold of 10.0 percent.

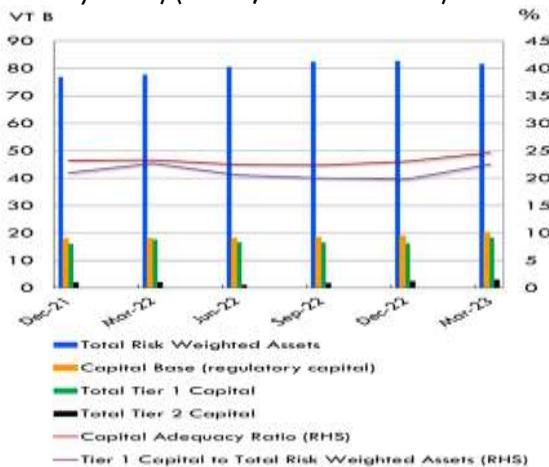

The quarterly increase in CAR was mostly attributed to 5.6 percent expansion in total capital base to VT20.1 billion as well as decrease in total risk weighted assets (TRWA) of 1.2 percent to VT81.7 billion. Over the year, both capital base and TRWA grew by 11.1 percent and 5.1 percent correspondingly.

The drop in TRWA was due to decline in both on and off balance sheet risks by 1.6 percent to VT73.8 billion and 10.3 percent to VT2.1 billion despite operational

risks rising by 4.1 percent to VT7.9 billion over the quarter. Year-on-year saw increases in both on balance sheet risk weighted assets and operational risks by 5.1 percent and 4.1 percent respectively while off balance sheet risk reduced by 1.8 percent.

Figure 26: Capital Adequacy & Tier 1 Ratio

(Quarterly Data) (Levels, Billions of Vatu)

The reviewed period also saw growth in capital base mainly due to a 12.5 percent increase in tier 1 capital to VT18.4 billion, despite, tier 2 capital shrinking by 43.5 percent quarter-on-quarter to VT1.8 billion. The increase in tier 1 capital resulted from growth in prior years retained earnings while decrease in tier 2 capital mostly reflected movements in year-to-date profits and further adjustments. However, over the year both tier 1 and 2 capital rose by 4.3 percent and 55.9 percent respectively.

Financial Performance

The industry's financial performance remained satisfactory despite being heavily challenged by the recent pandemic. The reviewed quarter registered underlying profits of VT725.2 million which was less than that of the previous quarter by 9.5 percent, however, more than that of the same quarter the previous year by 89.1 percent. The quarterly increase mostly reflected the increase in total operating expenses over the quarter by 3.0 percent to VT1.7 billion with total operating income contracting by 1.1 percent to VT2.4 billion. Similarly, yearly increases of 31.4 percent and 16.2 percent were witnessed in both total operating income and expenses in that order.

Interest income rose over both the quarter and year by 0.01 percent and 27.1 percent respectively to VT1.6 billion. In addition, interest expense increased both quarterly and yearly by 16.6 percent and 16.9 percent correspondingly to VT163.6 million. Consequently, net interest income fell by 1.6 percent quarter-on-quarter to VT1.4 billion, although registering a growth of 28.4 percent year-on-year. Furthermore, non-interest income decreased over the

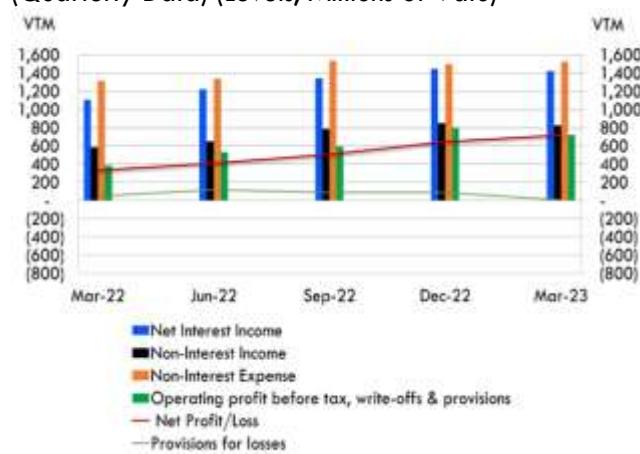

quarter by 3.2 percent to VT825.7 million while recording an increase of 40.7 percent over the year. Non-interest expense climbed to VT1.5 billion representing a quarterly growth of 1.7 percent; yearly growth of 16.1 percent.

Despite erosion of earnings with the increase in risks, favourable economic indicators had resulted in the reduction of specific provision expenses over the reviewed quarter. Specific provisions expense for loan losses decreased over the quarter and year by 72.8 percent and 67.9 percent respectively to VT33.6 million. General provision expenses of negative VT26.0 million was registered for reviewed quarter, lower than the previous quarter and year by 13.0 percent and 41.7 percent correspondingly. Specific provisions expense for other losses registered both quarterly and yearly contraction of 92.7 percent and 95.2 percent respectively to negative VT0.5 million. Therefore, the industry recorded a net profit of VT717.8 million compared to VT646.9 million recorded at the end of the previous quarter and VT334.0 million recorded in the same quarter of the previous year.

The above financial performance development resulted in quarterly strengthening of both annualised ROA and ROE to 1.8 percent (1.2 percent: Dec-22; 0.9 percent: Mar-22) and 13.1 percent (9.1 percent: Dec-22; 6.5 percent: Mar-22) respectively. In contrast, interest margin to gross income slightly decreased to 63.3 percent compared to 64.1 percent and 65.4 percent recorded during the previous quarter and year respectively. In addition, non-interest expense to gross income improved to 67.8 percent (71.1 percent: Dec-22; 77.4 percent: Mar-22).

Figure 27: Earnings – Domestic Banks

(Quarterly Data) (Levels, Millions of Vatu)

Asset Quality

The industry's loan book further deteriorated as non-performing loans (NPLs²⁵) depicted quarterly and yearly expansions of 4.3 percent and 2.6 percent respectively to VT11.7 billion. Total NPLs to gross loans²⁶ ratio also increased compared to the previous quarter to 15.7 percent (15.1 percent: Dec-22, 16.3 percent: Mar-22). Net NPLs to capital ratio remained high and further increased to 42.9 percent at the end of the reviewed period (42.1 percent: Dec-22; 46.7 percent: Mar-22). This is the result of increase in NPL over the quarter despite growth in capital.

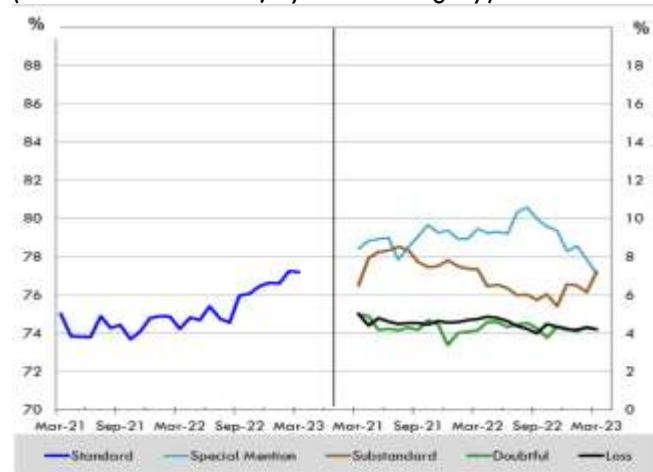

Development within the high credit risk categories saw substandard loans increase quarter-on-quarter by 10.6 percent to VT5.4 billion and 5.1 percent year-on-year. In contrast, doubtful loans dropped over the quarter by 1.3 percent to VT3.2 billion, however, rose by 7.6 percent when compared over the year. Loss loans recorded at VT3.2 billion was an incline of 0.02 percent for the quarter while it was a decline of 5.6 percent over the year.

The majority (86.0 percent) of the lending book remained as performing loans, i.e., standard and special mention loans. Standard loans grew over the quarter and year by 1.1 percent and 11.0 percent respectively to VT57.9 billion. On the other hand, special mention loans was reduced, both quarterly and yearly, by 13.8 percent and 19.6 percent correspondingly to VT5.3 billion. The movements within these performing loan categories resulted mainly from increase in credits and reclassification of loans over the reviewed period.

General provisions dropped over the quarter by 3.7 percent to VT3.0 billion, however, was an incline of 1.5 percent when compared annually. Similarly, specific provisions decreased quarterly by 1.6 percent to VT3.1 billion which was a yearly increase on 3.7 percent.

Specific provisions to non-performing loans stood at 26.4 percent (28.0 percent: Dec-22; 26.2 percent: Mar-22) while general provisions to gross loans was 4.0 percent (4.2 percent: Dec-22; 4.2 percent: Mar-22).

Figure 28: Asset Quality – Domestic Banks
(Share of Total Loans, By Loan Category)

Private Sector Lending

The private sector credit²⁷ (PSC) showed growth over both quarter and year of 0.2 percent and 4.7 percent respectively to VT64.5 billion. The expansion is attributed to general increase in demand for credits within the economy despite, banks continuing to maintain tight book management. Major sectors contributing to the increase during the reviewed quarter includes: agriculture (1.4 percent to VT0.9 billion), distribution (0.4 percent to VT6.4 billion), transport (9.9 percent to VT1.7 billion), construction (6.2 percent to VT3.4 billion), professional & other (0.1 percent to VT5.3 billion) and personal (1.4 percent to VT33.9 billion).

In contrast, the following major sectors depicted quarter-on-quarter declines: tourism (5.4 percent to VT8.2 billion), manufacturing (2.7 percent to VT1.3 billion) and government (1.3 percent to VT1.5 billion).

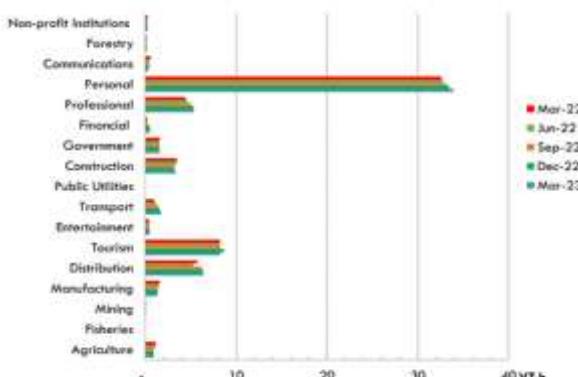

Private sector credits continue to record high concentration in loans to personal (52.6 percent), tourism (12.7 percent), distribution (9.9 percent), professional & other (8.3 percent) and construction (5.2 percent) sector.

²⁵Include loans & advances classified as Substandard, Doubtful & Loss

²⁶Loans & Advances to both residents & non-residents

²⁷Exclude credits to non-residents

Figure 29: Private Sector Credit Domestic Banks
(Quarterly Data, Levels, Billions of Vatu)

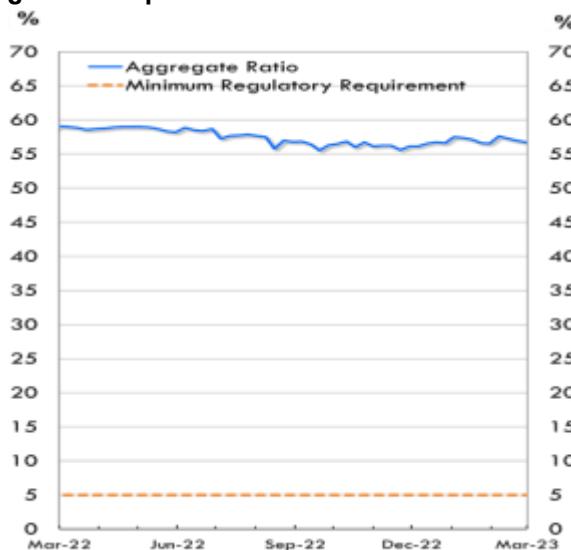

Liquidity Position

The domestic banking industry's liquidity position remained high with a liquid asset ratio (LAR) of 57.0 percent at the end of March 2023 (56.6 percent: Dec-22; 58.9 percent: Mar-22) which is well above the minimum regulatory threshold of 5 percent.

Total holdings of Vatu liquid assets rose quarter-on-quarter by 1.2 percent, however, decreased by 1.0 percent year-on-year to VT45.5 billion. This is a VT39.9 billion in excess over the required threshold of VT5.6 billion. Customer deposits continued to be the core source of funding during the reviewed period.

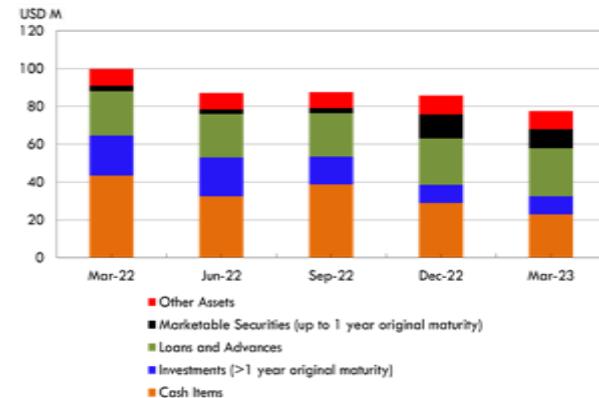

Figure 30: Liquid asset ratio –Domestic Banks

International Banks

Financial Position

Figure 31: Offshore Banking Industry – Total Assets
(Millions of USD, Quarterly Data)

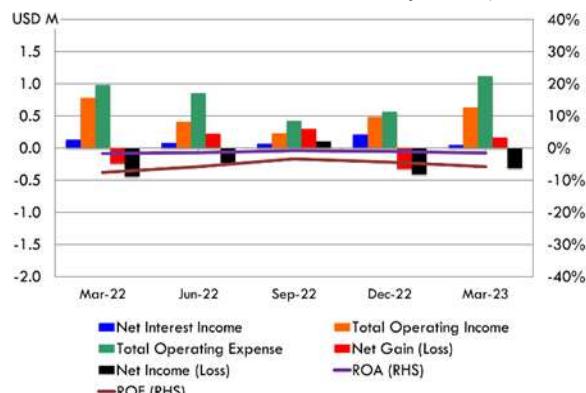

The international banking industry's total asset fell quarter-on-quarter and year-on-year by 9.6 and 22.3 percent respectively to USD77.6 million at end of reviewed quarter. The quarterly movement attributed mostly to drop in the following asset components; cash items by 20.5 percent to USD22.9 million, marketable securities by 22.4 percent to USD9.9 million and other assets by 3.0 percent to USD9.– million correspondingly. Inversely loans grew by 3.5 percent to USD25.4 million while investments remain stable at USD9.6 million.

Similarly, total liabilities (less capital) also fell quarter-on-quarter and year-on-year by 13.8 percent and 28.3 percent respectively to USD55.1 million at quarter end. The quarterly movement resulted from declined in deposits by 14.8 percent to USD50.1 million, term debt & other borrowings by 8.9 percent to USD1.1 million and accrued liabilities by 3.6 percent to USD3.3 million. In contrast, other liabilities increased quarter-on-quarter by 26.2 percent to USD558.0 thousand.

Financial Performance

Figure 32: Offshore Banking Industry Earnings
(Millions of USD & Percent; Quarterly Data)

The offshore banking industry's net income showed improvement over the first quarter of 2023 as compared to previous quarter and same quarter of 2022.

Total operating income grew quarter-on-quarter by 30.8 percent to USD632 thousand while net gain on securities and foreign exchange grew by 151.7 percent to USD167 thousand. On the other hand, total operating expense grew significantly by 95.8 percent to USD1.1 million. Consequently, the industry made a loss of USD319 thousand. Nevertheless, the loss is smaller than previous quarter and year by 22.4 percent and 27.8 percent respectively.

Both ROA and ROE declined by 0.4 percentage point to -1.6 percent and 1.3 percentage point to -5.8 percent respectively during the reviewed period

The quarterly growth in operating income reflected rise in non-interest income by 155.8 percent to USD527 thousand, driven solely by rise in other services charges, commissions and fees. In contrast, interest income fell by 62.1 percent to USD105 thousand. Over the year, both non-interest income and interest income fell by 12.2 percent and 42.0 percent correspondingly.

On the other hand, quarterly growth in operating expense was driven mostly by 112.4 percent rise in non-interest expense to USD1.1 million. Inversely, interest expense dropped by 22.9 percent to USD54.0 thousand, solely related to decline interest on securities and loans. Yearly basis, both non-interest expense and interest expense grew by 13.2 percent and 17.4 percent respectively.

Capital

Figure 33: Offshore Banking Industry – Capital
(Millions of USD & Percent; Quarterly Data)

The international banking industry remained well capitalised at the end of the reviewed quarter. Capital adequacy ratio increased quarter-on-quarter by 9.6 percentage points to 96.9 percent, well above the regulatory requirement of 12 percent. The quarterly

movement was supported by both increased in capital base and declined in total risk weighted assets by 3.2 percent to USD21.9 million and 7.1 percent to USD22.6 million respectively.

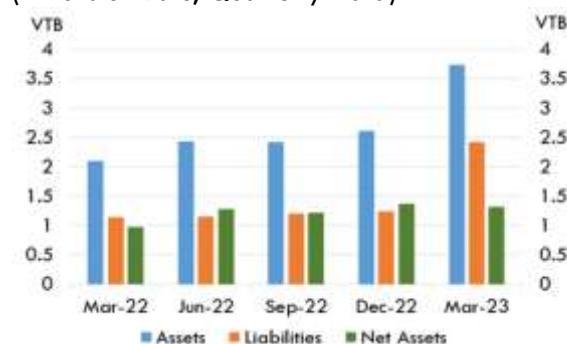

Capital base is comprised mostly of tier 1 capital (99.9 percent). Tier 1 capital expanded quarter –on-quarter by 4.8 percent to USD21.9 million, driven mostly by increase in paid up capital by 2.2 percent to USD30.7 million. In addition, the increased is further supported by fall in unadjusted losses and goodwill and other intangible assets by 43.1 percent to USD1.1 million and 3.8 percent to USD200 thousand correspondingly. In contrast, disclosed reserves & earnings declined by 4.4 percent to (USD7.0 million).

Developments within the risk-weighted assets saw a quarter-on-quarter fall in both on & off balance sheet risk assets and operational risk assets by 7.5 percent to USD19.5 million and 4.8 percent to USD2.9 million correspondingly.

3.5 INSURANCE SECTOR DEVELOPMENTS

Domestic Insurers

Figure 34: Financial Position
(Billions of Vatu, Quarterly Data)

The admissible asset position for the domestic insurance industry in March 2023 increased by 43 percent to VT3.7 billion (VT2.615 billion: Dec 22). The increase is attributed mainly from increase in amount due from reinsurers by 775 percent to VT1.2 billion (VT140 million: Dec 22). Other asset components that record a similar increase are other assets (prepayment) by 7 percent to VT8.3 million (VT7.7 million: Dec 22). Premium receivable net of provision for doubtful debts increased by 5 percent to VT278 million (VT264 million: Dec 22) and Cash at bank/deposits slightly increased by 1 percent to VT2.217 million (VT 2.202 million: Dec 22).

Insurance liability for March quarter review increased by 94 percent to VT2.4 billion (VT1.2 billion: Dec 22). The increase is attributed largely to an increase in cross outstanding claims by 343 percent to VT1.2 billion

(VT283 million: Dec 22), followed by an increase in contingency by 253 percent to VT159 million (VT45 million: Dec 22). Gross outstanding claims is the major component under liabilities and comprise of 52 percent of total liabilities.

Figure 35: Margin of Solvency

(Billions of Vatu, Quarterly Data)

MRSM – Minimum required solvency margin

SS – Solvency surplus

The total domestic solvency position declined by 4 percent to VT1.319 billion (VT1.371 billion: Dec 22). The total solvency margin for this reporting quarter is maintained at a satisfactory level. The required minimum solvency margin QOQ increased by 189 percent to VT102 million (VT35 million: Dec 22). The solvency surplus position (after deduction of the minimum required solvency margin) dropped by 0.9 percent to VT1.2 million (VT1.3 million: Dec 22).

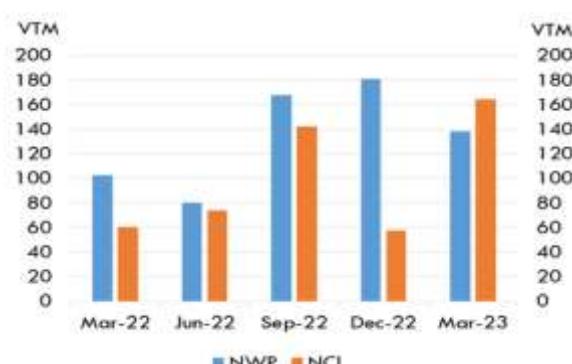

Domestic Industry Performance

Gross Premium (GP)

The total gross premium declined by 14 percent to VT495 million (VT574 million: Dec 22). Net written premium declined significantly by 63 percent to VT138 million (VT373 million: Dec 22). Reinsurance expenses increased by 77 percent to VT356 million (VT201 million: Dec 22).

Figure 36: Net Written Premium and Net Claims Incurred.

(Millions of Vatu, Quarterly Data)

Claims

The gross claims incurred had a significant increase (due to TC Judy & Kevin claims) by 705 percent to VT1.4 billion (VT181 million: Dec 22). Gross claims comprised all historical and recent claim, provisioning and loss from reinsurance costs. The increase in gross claims reflects more claims being reported and historical claims being settled. This also includes adjustments to claim to provision. Net claims incurred also increased by 185 percent to VT164 million (VT57 million: Dec 22).

International Insurers

Figure 37: Financial Position

(Thousands of USD, Quarterly Data)

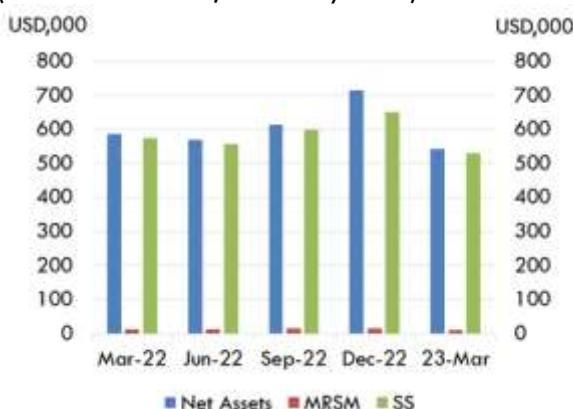

Total assets for the international market increased by 0.5 percent to USD560 thousand (USD536 thousand: Dec 22). Cash on hand and bank deposits which comprised 100 percent of total assets increased by 24 percent to USD560 thousand (USD451 thousand: Dec 22).

Total liabilities recorded in the international market declined by 48 percent to USD19 thousand (USD37 thousand: Dec 22). Unexpired risk which comprises of 91 percent of total liability decreased by 67 percent to USD17 thousand (USD 35 thousand: Dec 22). IBNR which comprises 0.6 percent of total liabilities remained constant at USD1.2 thousand (USD 1.2 thousand: Dec 22).

In comparison to the same quarter of last year, total assets had decreased by 9.1 percent to USD560 thousand (USD616 thousand: Mar-22) and Net assets declined by 7.6 percent to USD541 thousand (USD585 thousand: Mar-22).

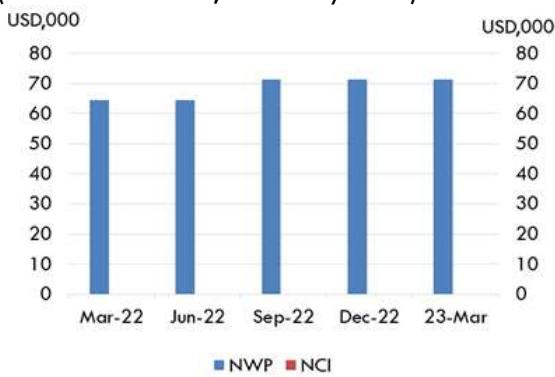

Figure 38: Margin of Solvency
(Thousands of USD, Quarterly Data)

MRSRM – Minimum required solvency margin
SS – Solvency surplus

Solvency position decreased by 24 percent to USD541 thousand (USD713 thousand: Dec 22). Minimum Required Solvency declined by 25 percent to USD10 thousand (USD14 thousand: Dec 22). Solvency Surplus decreased by 18 percent to USD529 thousand (USD649 thousand: Dec 22).

Figure 39: Business Performance
(Thousands of USD, Quarterly Data)

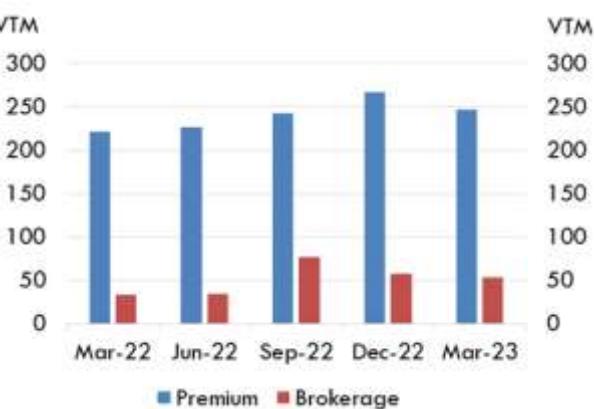

NWP – Net Written Premium NCI – Net Claims Incurred

Net written premium remained constant at USD71.3 (USD71.3 thousand: Dec 22). No Net Claims incurred were reported in this quarter. Compared to the same quarter last year, Net written Premium had increase by 11 percent to USD71.3 thousand (USD64.4 thousand: Mar 22).

Insurance Brokers Overview.

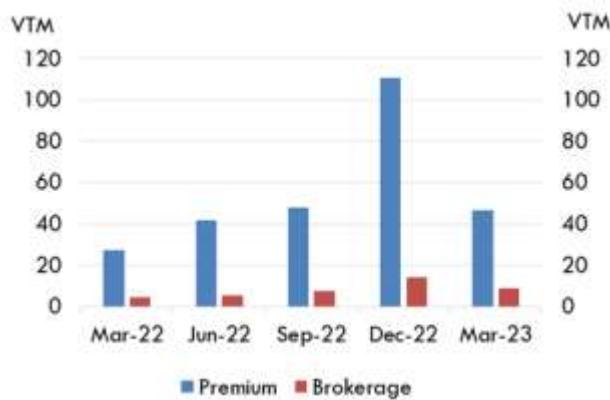

Figure 40: Domestic Broker Business
(Millions of Vatu, Quarterly Data)

The total premium transacted from the domestic market through broker as of end of March decreased by 8 percent to VT246 million (VT267 million: Dec 22). The decrease was attributed to the decrease in number of renewals & new business with local insurers during this period. The total brokerage commission also decreases by 7 percent to VT53 million (VT57 million: Dec 22).

In comparison to the same quarter of 2022, premium increased by 11 percent to VT246 million (VT221 million: Mar-22). The brokerage commission also increased by 58 percent to VT53 million (VT33 million: Mar-22).

Figure 41: Offshore Broker Business
(Millions of Vatu, Quarterly Data)

The premium remitted offshore through brokers declined by 58 percent to VT46 million (VT110 million: Dec 22). The total brokerage commission declined by 38 percent to VT8.9 million (VT14 million: Dec 22).

In comparison in the same quarter 2022, the premium increased by 71 percent to VT46 million (VT27 million: Mar 22). The brokerage showed an increase of 104 percent to VT8.9 million (VT4.3 million: Mar 22).

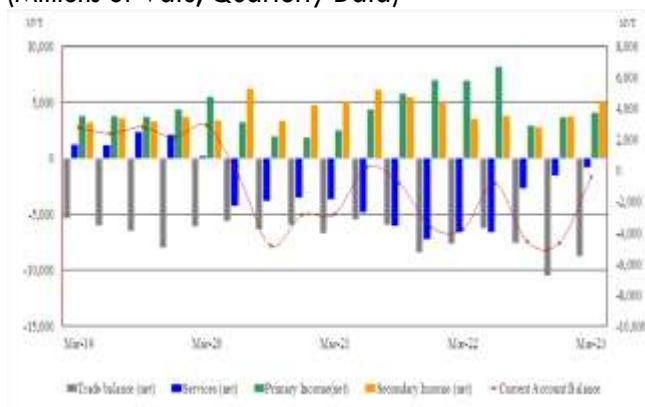

4 EXTERNAL SECTOR DEVELOPMENTS

4.1 BALANCE OF PAYMENTS

Current Account Balance

Vanuatu's current account balance (CAB) improved further during the current quarter, as reflected in reduction in CAB deficit by 91 percent and 89.3 percent from the previous quarter and the same quarter of the previous year, respectively. This favorable trend reflected improvements in trade in goods and services and income balances. Financial and capital account declined, respectively.

Figure 42: Vanuatu's Current Account Balance
(Millions of Vatu, Quarterly Data)

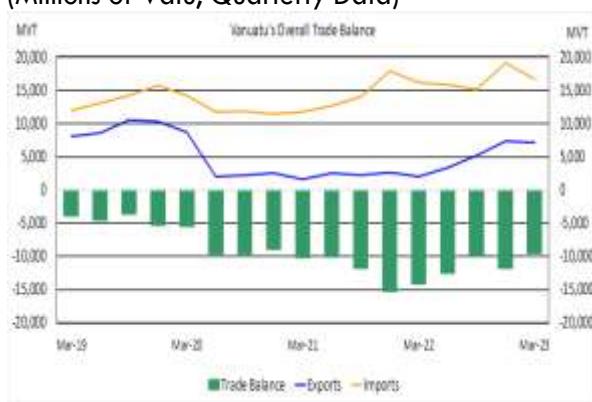

Source: RBV

Trade in Goods

Vanuatu's overall trade balance deficit was reduced by 20.7 percent in the current quarter owing to the decline in imports and strong growth in tourism earnings.

Figure 43: Trade in Goods and Services
(Millions of Vatu, Quarterly Data)

Sources: Vanuatu Bureau of Statistics (VBS) and RBV

Trade in goods balance was favourable owing mainly to a 25 percent reduction of overall imports. The following categories recorded declines during the

quarter; food and live animals (-34 percent), mineral fuels (-17 percent), basic manufactures (-25 percent), machinery and transport equipment (-17 percent) and miscellaneous products (-43 percent). Total exports further declined by 55 percent as all export commodities contracted; exports of kava (-42 percent), copra (-39 percent), and beef (-74 percent).

Trade in services balance has continued to recover since the reopening of borders in July 2022. This has led to services receipts outweighing services payments. Total services receipts increased by 35 percent mainly driven by tourism earnings which has regained its share (60 percent share) in the overall service receipts. Conversely, payment of services to non-resident units increased by 14 percent relative to December 2022. The increase in payments was mainly attributed to freight charges and short term worker's spending abroad representing total shares of 26 and 36 percent on the overall service imports over the March quarter of 2023.

Figure 44: Current account balance and Trade on Goods and Services Balance
(Millions of Vatu, Quarterly Data)

Sources: VBoS and RBV

Primary Income Account

The positive net primary income balance expanded by 11 percent as primary income receipts offsets income payments to abroad. The bulk of primary income receipts were related to compensation of employees abroad. Compensation of employees grew by 29 percent as the stock of seasonal workers abroad increased on average by 11 percent over the reviewed quarter. The increase in primary income payments reflected improvements on investment income paid abroad by resident foreign direct investment companies.

Figure 45: Primary Income Account
(Millions of Vatu, Quarterly data)

Source: RBV

Secondary Income Account

The net secondary income balance improved by 36 percent relative to the December quarter 2022. This was largely due to a 34 percent increase in secondary income inflows outweighing a 11 percent decline in secondary income outflows. The main contributions to overall inflows was transfers purposely for TC Judy and Kevin recovery in particular non-life insurance claims and donor partner transfers to the Government sector.

Figure 46: Primary and Secondary Income Account
(Millions of Vatu, Quarterly data)

Source: RBV

Capital Account

The capital account balance decreased by 11 percent from the previous quarter. This reflected the reduction in inflow of donor funds towards major government capital projects and other funds in support of the government's priority sectors. However, inward transfers to other sectors increased by 32 percent relative to the December quarter 2022.

Financial account

The financial account (net) improved relative to the December quarter 2022. This was attributed to higher increase in foreign assets outweighing increments in

foreign liabilities. Improvements in foreign assets were mainly driven by other investment on foreign assets placed abroad while the rise in foreign liabilities mainly reflected inward direct investment placements.

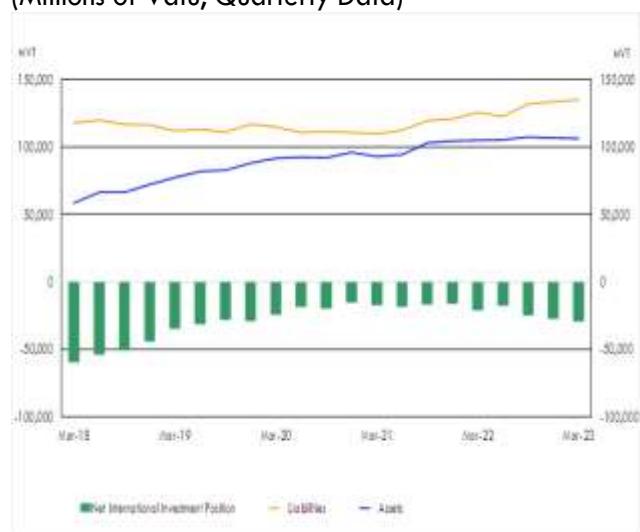

Official Reserves

Gross official foreign reserves increased by 1.0 percent from the previous quarter to VT 71,307 million (\$693 USD). This remained adequate to finance approximately 9.0 months of import cover.

Vanuatu's International Investment Position (IIP)

Vanuatu's International Investment Position further deteriorated by 7.7 percent over the March quarter stemming mainly from a 0.4 percent reduction in total foreign assets and a 1.2 percent increase in foreign liabilities.

Figure 47: Vanuatu's International Investment Position
(Millions of Vatu, Quarterly Data)

Source: RBV

4.2 EXCHANGE RATE DEVELOPMENTS

The movements of the Vanuatu Vatu currency vis-à-vis the major currencies over the reviewed quarter reflected developments in the economic and financial conditions of Vanuatu and its major trading partners. The Vatu currency depreciated against the USD by 0.4 percent while it appreciated against the AUD, NZD and EURO by 0.6, 1.0 and 2.6 percent, respectively.

CHRONOLOGY OF MAJOR EVENTS

No.	BRIEF DESCRIPTION OF MAJOR EVENTS	EFFECTIVE DATE
1.	<p>The Government of Japan formalised an agreement with the Government of Vanuatu for a grant assistance totalling 196 million Japanese Yen (approximately VT196 million) to fund navigation equipment. The agreement was signed in Port Vila on 13th of January 2023. Shipping is the main means of transport for the majority of people within Vanuatu, particularly those outside urban areas who rely on inter-island shipping for goods, and services, and essentials such as food, fuel and medicines, and the transport of produce to local markets. The assistance, therefore, is timely, as the security of ports and navigation is important for the shipping sector and economic and social activities, and tourism. The project aligns with Vanuatu's National Sustainable Development Plan (NSDP) and The National Planning Framework (NPF), which are national goals for sustainable development.</p> <p>(Vanuatu Daily Post, 14 January 2023)</p>	January 14, 2023
2.	<p>The International Monetary Fund (IMF) projected Vanuatu's economy to grow by 1.9 percent in 2022. Growth is expected to strengthen, reaching 3.4 percent in 2023., driven by return of tourism, higher public infrastructure spending (construction) and ongoing recovery of trading partners. However, challenges remain such as a new spread of COVID-19 variant, surging commodity prices, the suspension of Vanuatu Visa waiver agreements by European Union (EU), and the Air Vanuatu operational and financial distress, which affect the tourism arrivals in Vanuatu. According to Evan Papargeogiou, IMF's Mission Chief to Vanuatu, some of the issues will take little longer to be resolved. He added that the Citizenship program should not be relied on as an ongoing revenue source for Vanuatu. The IMF will release a report of its findings in March 2023, which will have a host of policy recommendations, including a medium-term fiscal strategy plan.</p> <p>(Vanuatu Daily post, January 26, 2023)</p>	January 26, 2023
3.	<p>The Vanuatu Department of Customs and Inland Revenue (DCIR) launched the second phase of its concession module. This concession module is an online system known as the Vanuatu Electronic Single Window. It will be used by the DCIR to issue Certificate of Origin to different businesses during international trade transactions, and to facilitate applications for concessions between respective government agencies and businesses. Other government agencies that will benefit from this second phase module are the Department of Energy, the Department of Environment, and the Telecommunications and Broadcasting Regulator (TRBR).</p> <p>(Vanuatu Daily Post, 27 January 2023)</p>	January 27, 2023
4.	<p>The Government of Japan has provided grant assistance to the Department of Water Resources, under the Ministry of Land and Natural Resources to fund the Provision of Water Supply for Vao area project in Malekula, worth VT21 824 715. The project will improve the water supply system and sanitation/hygiene environment for Vao area through the installation of the necessary systems such as two solar pumps, water distribution pipelines and 62 shared water taps. The supply of safe water is fundamental to people's lives and Japan's commitment to this sector is consistent with Vanuatu's National Sustainable Development Plan. To date, the embassy of Japan has formalized 134 projects, which amount to an approximate value of 11 million US dollars in total.</p> <p>(Vanuatu Daily Post, 7 February 2023)</p>	February 7, 2023

No.	BRIEF DESCRIPTION OF MAJOR EVENTS	EFFECTIVE DATE
5.	<p>Vanuatu and Australia have agreed to begin consultation on Vanuatu's participation in the Pacific Engagement Visa, an initiative of the Australian Government to strengthen ties with the Pacific. The Australian Government plans to implement this new Pacific Engagement Visa in July 2023. It will allow up to 3,000 nationals of Pacific Island Countries to migrate to Australia as permanent residents each year. Under the program, applicants will register themselves, their partners and dependent children in a ballot, and if successful, they will then apply for the visa, providing fair and transparent access to the program. Requirements for being granted a visa include being aged 18 to 45, having a formal offer for a full-time job in Australia, and meeting basic English language, health and character requirements.</p> <p>(Vanuatu Daily Post, 28 February 2023)</p>	February 28, 2023
6.	<p>The World Bank (WB) has provided VT1.13 billion grants to support the government's response to the impacts of Tropical Cyclones (TCs) Judy and Kevin and a magnitude 6.5 earthquake that struck just off Santo. According to the statement from WB, economic modelling suggests Vanuatu already faces an average of US\$48 million per year in risk to assets from earthquakes and cyclones alone. In 2020, Cyclone Harold caused US\$617 million (61% of GDP) in economic impacts. The VT1.13 billion grants are made available through the Second Development Policy Grant with a Catastrophe-Deferred Drawdown Option that was approved by WB in June 2022. Along with provisions for emergency response, this operation was designed to improve risk reduction, preparedness, and recovery from disasters. The funding will provide vital support to the government's recovery and response efforts following the disasters.</p> <p>(Vanuatu Daily Post, 14 March 2023)</p>	March 14, 2023
7.	<p>The Ministry of Finance and Economic Management (MFEM) and the Japan International Cooperation Agency (JICA) signed the amended grant agreement of two JICA grant aid projects on March 15 2023. The two projects are the reconstruction of Teouma Bridge on Efate following recent disasters and the construction of a hydropower station on Santo. The projects grant agreement was signed in the past, however, the Japanese Government provided additional funding because of recent price increases of construction materials and international shipping cost brought on by the COVID-19 pandemic and the war in Ukraine, and in light of the importance of this vital infrastructure. The additional funding will ensure completion of the projects. The initial grant for Teouma Bridge signed in 2019 was VT1, 537,300,000, and the current agreement includes an additional VT 612,731,000 funding, which sums up to VT2, 050,030,000. Likewise, the initial grant for the Sarakata project in Santo was VT3, 541,610,000, and the new agreement adds an additional VT 612,731,000, which totaled to VT 2,050,030,000.</p> <p>(Vanuatu Daily Post, 18 March 2023)</p>	March 18, 2023
8.	<p>The Vanuatu Government plans to allow 1,500 foreign workers to enter the country under Special Category Visas, free of charge, for a period of 12 months. In announcing the plan in Parliament, the Minister of Finance and Economic Management, John Salong, said this will address the expected increase in demand following the re-opening of the borders in mid-2022, and high job turnover from the impact of labour drain associated with seasonal work programs in Australia and New Zealand.</p> <p>(Vanuatu Daily Post, 23 March 2023)</p>	March 23, 2023

No.	BRIEF DESCRIPTION OF MAJOR EVENTS.	EFFECTIVE DATE
9.	<p>A budget support worth VT1.5 billion was given by the Australian Government to assist in the recovery from the impact of COVID-19, and recent natural disasters. Of this total, VT381.7 million will be allocated for the PACER Plus coordination and related activities and to strengthen trade and supply chains. A further VT877.91 million was to support the aviation sector, and to strengthen Vanuatu's cybersecurity infrastructure and labour mobility. A total of VT267.19 million, will assist to "reform areas in the financial sector, State Owned Enterprises (SOEs), and public finance management (PFM)" In addition, VT181.7 million was for the construction of roads in rural areas.</p> <p>(Vanuatu Daily Post, 25 March 2023)</p>	March 25, 2023
10.	<p>On the 24th of March a contract between an Australian company, Orion Solar and the Minister of Infrastructure Marcellino Barthelemy Telukluk, was signed to install a solar lighting system at the Tanna airfield for VT125 million. Orion Solar will install the solar ground lighting system over the next three months. It will improve safety and allow landing at night with the possibility of additional flights, said Minister Telukluk.</p> <p>(Vanuatu Daily Post, 25 March 2023)</p>	March 25, 2023
