R	=	Revised by Source

1. EXECUTIVE SUMMARY

The global economy showed resilience in 2024, but due to rising uncertainties, including trade tensions and policy changes, global growth is projected to slow in 2025. Both the Advanced Economies and Emerging Markets & Developing Economies (EMDEs) are contributing to the slowdown in growth. In the Advanced Economies, growth uncertainties and weaker demand are key factors, particularly for the United States (US) and Euro Area. In EMDEs growth is dampened by tariffs and economic unpredictability.

Domestically, Vanuatu's economy is gradually recovering from the December 2024 earthquake. The agriculture and services sectors experienced disruptions due to the closure of Port Vila's Central Business District (CBD). A significant portion of services-oriented businesses have relocated to peripheral areas and are operating below optimal capacity. Growth within the industry sector is primarily driven by ongoing public infrastructure projects. The economy continues to experience disinflationary pressures, with prices easing from the elevated levels recorded in the previous year.

The Central Government achieved a fiscal surplus in the first quarter of 2025, driven by positive balances in both recurrent and donor-funded operations. The key contributing factors are increased inflows of budget support for post-earthquake recovery, donor funding for government projects, consistent recurrent revenue collection, and reduced expenditure levels.

Money supply growth was moderate in the first quarter of 2025. An increase in net foreign assets due mainly to inflows for post-earthquake recovery was offset by decline in net domestic assets. Reserve money growth fell due to a decline in excess reserves.

The domestic banking sector is well-capitalized, sound and highly liquid. The industry's financial performance remained satisfactory, supported by ongoing recovery from the pandemic, natural disasters, and post-earthquake reconstruction. Quality of loans has improved as non-performing loans were lower relative to the previous quarter and year. Private sector credit (PSC) grew steadily, driven by rising credit demand despite, banks continuing to maintain tight book management.

The insurance sector's total admissible assets grew substantially, driven by reinsurance inflows for earthquake-related claims. Similarly, total liabilities expanded owing to a sharp rise in gross outstanding claims, which accounted for 82 percent of total liabilities. Higher claims resulted in the decline in total solvency and minimum required solvency of insurers. Despite these declines, the insurers still maintain a solvency surplus above regulatory requirements.

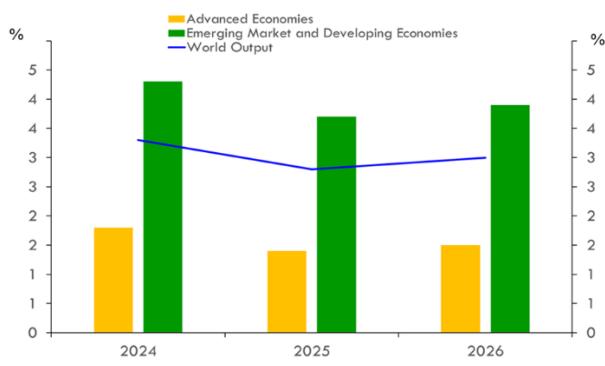

Vanuatu's revised current account balance improved significantly during the current quarter, driven by stronger balances in trade in services, primary income, and secondary income, which offset the increased deficit in trade in goods. Meanwhile, growth in the capital and financial accounts slowed compared to the previous period.

The RBV kept its monetary policy stance unchanged in the March 2025 quarter. Its official foreign reserves remained sufficiently above the minimum threshold of 4 months of import cover. Inflation was still below the RBV's inflation target range of 0 to 4 percent.

2. THE INTERNATIONAL ECONOMY

The global economy¹ demonstrated resilience in 2024, with stable growth projected to persist in 2025. However, due to rising uncertainties including trade tensions and policy shifts, global growth is projected to ease from 3.3 percent in 2024 to 2.8 percent in 2025. The slow growth was attributed to both the Advanced Economies and EMDE's. Growth in US and Euro Area are expected to weaken following greater economic uncertainty, and softer demand momentum thus attributed to the growth trend in Advanced Economies. For the EMDE's, the downward movement reflected the imposed tariffs and the growth uncertainty. Global headline inflation is expected to decline, but at a much slower pace than previously anticipated. Inflation is projected to decline to 4.3 percent in 2025.

Figure 1: World GDP Growth
(Percentage Change; Annual Data)

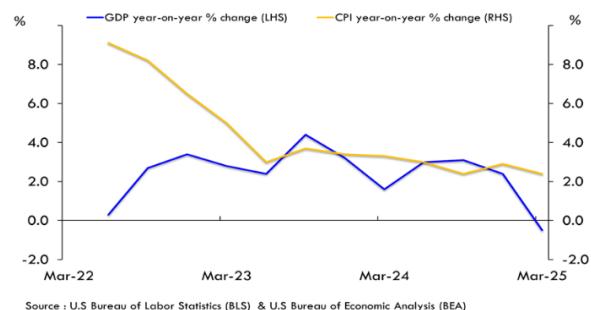

Vanuatu's main trading partners

The US economy contracted by 0.5 percent in the March quarter after it expanded by 2.4 percent in December 2024 quarter. The contraction was mainly led by decreased government spending and increased imports, in particular, high payments made by firms in anticipation of high costs following Trump's tariff policy announcements. The offsets were increased investments, consumer spending, and high exports. The unemployment rate registered 4.2 percent relative to 4.1 percent in the December 2024 quarter. Annual headline inflation rose 2.4 percent, compared to 2.9 percent in the December 2024 quarter. The main contributors were: food (+2.8%), and all items less food and energy (+2.8%), while, the offset was price for energy (-3.5%). On the trade front, the current account continues to record an increased deficit of USD\$63.2 billion, compared to USD\$2.2 billion deficit recorded in the March 2024 quarter. The widening of the deficit reflected increased imports of goods (USD\$346.8 billion), particularly, consumer, capital,

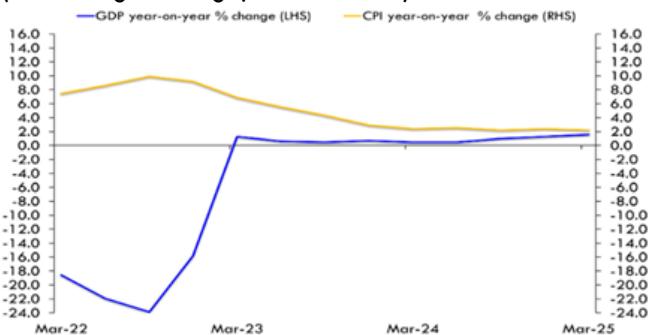

automotive and industrial supplies which outweighed, exports of goods (USD\$183.2 billion). In light of the recent economic uncertainty evolving in the US economic environment, the Federal Reserve maintained the Fed policy stance at 4.5 percent.

Figure 2 : US GDP and CPI
(Percentage Change; Annual Data)

Annual economic growth in the Euro Area expanded by 0.6 percent relative to a 0.4 percent growth in the previous quarter. Growth was driven by increased household final consumption (+0.2%), gross fixed capital formation (+1.8%), and increased exports (+1.9%). The annual unemployment rate was 5.8 percent in March 2025, relative to 6.3 percent in December 2024. Moreover, the annual headline inflation rose 2.2 percent, compared to 2.4 percent in the December 2024 quarter. The main attributors were: food, alcohol and tobacco (+2.9%), services (+3.5%), and non-energy industrial goods. The offset was energy price (-1.0%). In terms of trade, the Euro Area recorded a current account surplus with high exports (771.1bn), particularly, chemicals and related products group (42.8bn), and machinery and vehicles(1.3bn), which outweighed imports (706.8bn). In March, the European Central Bank further reduced its three key policy rates; the Deposit facility; (2.50%) main refinancing operations (2.65%), and, marginal lending facility; (2.90%).

Figure 3 : Euro Area GDP and CPI
(Percentage Change; Annual Data)

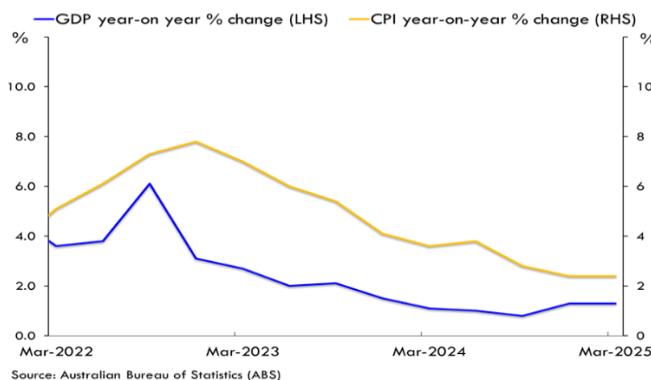

Source: Eurostat-European Commission

¹ Source IMF World Economic Outlook (WEO) April 2025

The Australian economy grew 1.3 percent in annual terms, a constant growth as in the December 2024 quarter. Growth was driven by household consumption (+0.2%) and private investments (+0.1%), while the offsets were decreased public investments (-0.1%), government spending and net trade (-0.1%). Annual inflation was 2.4 percent in the March quarter, relatively stable with the December 2024 quarter. The positive attributors were housing (+1.7%), education (+5.2%) and food and non-alcoholic beverages (+1.2%). In contrast, the offsets were recreation and culture (-1.6%) and furnishings, household equipment and services (-0.9%). The annual unemployment rate remained relatively stable at 4.0 percent, in both the March 2025 quarter and the December 2024 quarter. The current account balance recorded a deficit of \$14.7 billion, higher by \$1.7 billion in the December 2024 quarter (\$16.3 billion). This reflected the reduction in the surplus in trade in goods and services balance, offsetting the narrowing in net primary income deficit. The Reserve Bank of Australia maintained its official cash rate at 4.10 percent.

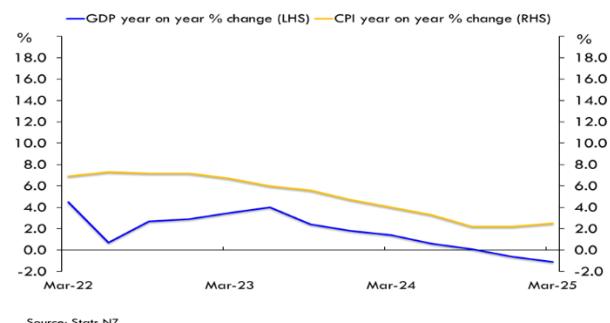

Figure 4 : Australia GDP and CPI
(Percentage Change; Annual Data)

The New Zealand economy contracted by -1.1 percent during the year to the March quarter, relative to -0.6 percent over the year to the December 2024 quarter. Subdued growth was driven by arts, recreation, and other services (-1.9%), information media and telecommunication (-0.8%) and wholesale trade (-0.5%). The offsets were business services (+2.4%), manufacturing (+2.4%), healthcare and social assistance (+1.4%), and household consumption (+1.4%), respectively. The annual unemployment rate remained relatively stable at 5.1 percent in both the current and previous quarter. Annual inflation recorded 2.5 percent, relative to 2.2 percent in the December 2024 quarter. Price increases were recorded for, rental for housing (+3.7%), local authority rate and payments (+12.2%) and purchase of housing (+1.9%). In contrast, the offsets were prices for petrol (-2.8%) and early childhood education (-22.8%). In terms of trade, the current account balance

deficit narrowed in the reviewed quarter compared to December 2024 quarter. This was attributed to the narrowing of the trade in goods and services balance offsetting the widening of the primary and secondary income deficits. The Reserve Bank of New Zealand maintained the official cash rate at 3.75 percent.

Figure 5: New Zealand GDP and CPI
(Percentage Change; Annual Data)

China's economy expanded by 5.4 percent in annual terms, the same growth as in the December 2024 quarter. This strong growth reflected increased industrial production (6.5%), services sector specifically, software and information technology services, and leasing and business services (5.3%), retail sales (4.6%) and investments (4.2%). Annual headline inflation declined 0.1 percent, relative to a positive 0.1 percent in the December 2024 quarter. Reduction in prices were noted for food, tobacco and alcohol (-0.7%), articles and services (-0.4%) and, transportation and communication (-1.9%), respectively. China's urban unemployment rate was 5.3 percent, relative to 5.1 percent in the December 2024 quarter. On the trade front, China continues to maintain a trade surplus balance, with its exports increasing at 6.9 percent, reflecting high exports of mechanical and electrical products while, being partly offset by fall in imports (-6.0%).

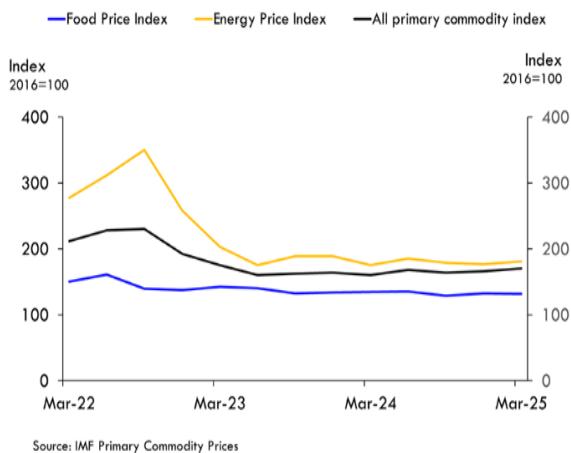

Figure 6: China GDP and CPI
(Percentage Change; Annual Data)

Commodity prices

International commodity prices showed a mixed outcome compared to December 2024. The IMF all primary commodities index rose to 2.6 percent relative to 1.5 percent in December 2024. The increase was largely attributed to rising prices for energy (+2.4%), and petroleum (+2.6%), which resulted from sanction imposed on Russia and Iran oil exports under President Trump's administration. On the other hand, the decline in food index (-0.4%) was driven primarily by the fall in the prices for corn, cereal, sugar and rice, owing to improved weather patterns, low demand and, abundant supplies².

Figure 7: Global Commodity Prices
(Price Index, Monthly data)

3. DOMESTIC ECONOMIC DEVELOPMENTS

3.1 REAL ECONOMY

Vanuatu's domestic economy is gradually recovering from the December 2024 earthquake, especially in Port Vila and Efate. Businesses within the agriculture and services sectors were affected as Port Vila's CBD remained closed. Majority of businesses in the services sector have relocated outside the CBD and have been operating below their optimal level. The ongoing public infrastructure projects remain the main driver of growth within the Industry sector. Post-earthquake recovery efforts and disinflation have boosted consumption, while investment remained steady. Annual disinflation continued into the current quarter as prices continued to ease from their peaks in the previous year.

Agriculture, Fisheries and Forestry (Primary) Sectors

Growth in the primary sector is estimated to have moderated owing to mixed performances in

production indicators. The closure of Port Vila's CBD has had a significant impact on crop and animal production; this is in addition to continuous labour constraint faced by this sector. During the current quarter, cocoa production increased, while production of copra, beef, kava and coffee have declined. Crude measures from commercial banks data showed that lending to the agriculture sector increased, while reduced lending for the forestry and fisheries sectors.

Copra production declined by 10 percent, reflecting stable producer prices. However, production was significantly higher by 99 percent relative to the March 2024 quarter. Cocoa production increased by 190.3 percent in the current quarter and 405.7 percent relative to same quarter last year reflecting favorable producer prices.

The volume of kava exported during the quarter fell by 36.3 percent. Similarly, export earnings decreased by 38.9 percent. This implies that both the production and export price of kava have decreased during the quarter. However, relative to a year ago, exports of kava have increased 8.6 percent, owing to higher domestic production as export earnings was still down at 13.3 percent.

Cattle production declined by 5.1 percent and 13.3 percent over the quarter and over the same period of the previous year. Coffee exports fell by 50 percent though it remain unchanged relative to a year ago. This signifies that domestic production of coffee was low though steady relative to a year ago.

According to monetary proxy indicators, lending to the agriculture sector increased quarterly (+8.8%) and annually (+9.5%). Lending to the forestry sector fell (-3.5%) quarter-on-quarter but rose (56.2%) year-on-year. Moreover, loans extended to the fisheries sector recorded a decline (-8.7%), but up (+30.7%) relative to March 2024.

Services Sector

The services sector is still recovering from the impacts of the December 2024 earthquake. With the closure of the Port-Vila CBD, most of the businesses within the services sector have temporarily relocated their operations around the outskirts of the city, mainly wholesale and retail, commercial banks, restaurants, telecommunication and real estate businesses. Partial indicators showed that during the reviewed quarter, air arrivals have declined, though cruise ship arrivals increased. Postal services increased. Crude Indicators from commercial banks credit depicted that loans to

² Food and Agriculture Organization of the United Nations.

majority of the subsectors within the services sectors have decreased.

Total number of visitor arrivals rose by 49.9 percent compared to the December 2024 quarter, although still lower by 41.0 percent over the same period in 2024. Higher tourist numbers relative to the previous quarter reflected a notable increase (+103.6%) in cruise ship arrivals to other ports (excluding Port Vila). Tourist arriving by air fell (-16.0%) relative to the previous quarter reflecting low travel season. Furthermore few of tourist related infrastructures and businesses on Efate are still at recovery stage and not fully operational. Total postal services increased by 9.2 percent driven by both domestic and international mails, however declined by 15.1 percent over the year.

Partial indicators from commercial banks lending showed that credit to the tourism sector declined relative to the previous quarter (-5.6%) and year (-14.5%). Wholesale and retail sector, recorded reduced credit by 6.9 percent and 11.7 percent over the quarter and same period of the previous year. Loans extended to the professional and other services sectors improved quarter-on-quarter (+11.5%) and year-on-year (+39.0%).

Industry sector

Growth in the industry sector remained solid during the reviewed quarter, underpinned by major government infrastructure projects as well as private sector construction activities. The trend in private sector construction is partially evidenced by increased commercial banks lending to majority of the subsectors within the industry sector.

The ongoing major infrastructure projects are the South Santo and Tanna road projects, the Sarakata hydro power extension, Norsup Airport extension and other small Airports upgrade. Moreover, added major infrastructure projects such as the Teouma bridge construction, the Luganville Urban road projects and the post-earthquake buildings demolition continued to boost the overall industry sector growth.

Commercial Banks lending to the construction sector increased quarter-on-quarter (+9.3%) and year-on-year (+23.4%). Lending to the manufacturing sector increased by 3.2 percent relative to the previous quarter though fell by 1.1 percent over the same period of the previous year. In contrast, lending to the mining and quarrying sector declined on a quarterly basis (-2.6%) and over the same quarter of 2024 (7.4%).

Consumption and Investment

Partial indicators of consumption have shown upward movements during the current period. Value added Tax (VAT) increased significantly by 114.0 percent over the quarter and 9.1 percent over a year ago, implying an increase in overall consumption in Vanuatu. Similarly, Government consumption, as represented by compensation of employees, grew by 3.6 percent over the March quarter and 7.6 percent over the same period of the previous year. The use of goods and services, on the other hand, declined by 16.4 percent and 36.1 percent over the reviewed quarter and the same period of the previous year, respectively.

Consumption proxies from the Utilities Sector also trended upwards, as total energy consumption increased by 7.4 percent over the quarter, although was lower (-7.1%) relative to a year ago. From the financial sector, commercial banks' lending for personal consumption increased by 4.3 percent and 21.1 percent quarter-on-quarter and year-on-year, respectively.

In terms of investment, growth in government investment expenditure is in line with the trend in the implementation of ongoing public sector infrastructure projects, as highlighted in the industry sector developments. Other partial indicators have shown mixed performances. Imports of machines and transport equipment rose by 8.6 percent over the quarter and 16.9 percent over the year. However, imports of cement fell by 11.4 percent and 67.5 percent over the two respective periods.

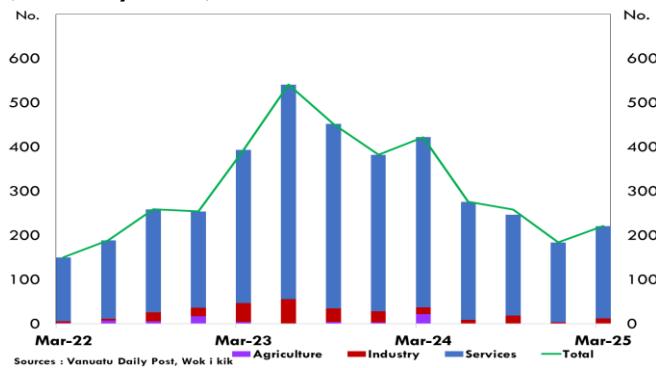

Partial indicators from commercial banks credit portrayed increased credit to businesses quarter-on-quarter (+2.2%) and year-on-year (+5.9%). Household investment, however, remained weak as lending for housing and land purchases fell by 3.9 percent and 4.4 percent over the quarter and over the year to March 2025.

Labor Market

Domestic labor demand has improved over the reviewed quarter, as reflected in the rise in total number of job advertisements (+20.1%), although it fell (-47.6%) over the same period of the previous year. The current trend was attributed to more job openings in the services and industry sectors, whilst no job advertisements recorded for the agriculture sector. Job openings within the services sector was predominantly driven by retail trade, accommodation and food services, finance and insurance and professional, scientific, technical and administrative services sub-sectors. For the industry sector, job openings were noted for manufacturing, electricity and water supply sub-sectors.

With reference to labour going abroad, the stock of domestic seasonal labour force overseas was estimated to have increased over the quarter by 35.1 percent (10,539 up from 7,799 workers) however, it fell by 8.3 percent (10,539 down from 11,487 workers) over the same period of the previous year.

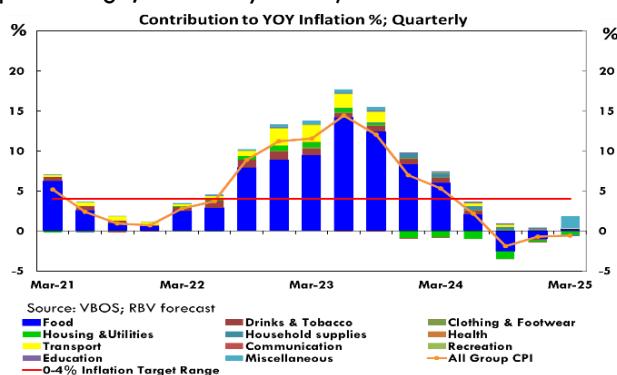

Figure 8: Job Advertisements (Quarterly Level)

Inflation

Vanuatu's annual headline inflation remained below the RBV's minimum inflation target band of 0-4 percent target over the quarter. The year-on-year headline inflation further declined by -0.6 percent in the March quarter, compared to -0.7 percent over the December 2024 quarter and 5.4 percent over the March 2024 quarter. By region, the reduction in inflation was mainly driven by a reduction of the Port Vila index (-1.3%), outweighing increases in the Luganville index (+1.5 percent) and Lenakel index (+3.9 percent).

Figure 9: Contributions to Annual CPI inflation (percentage, Quarterly levels)

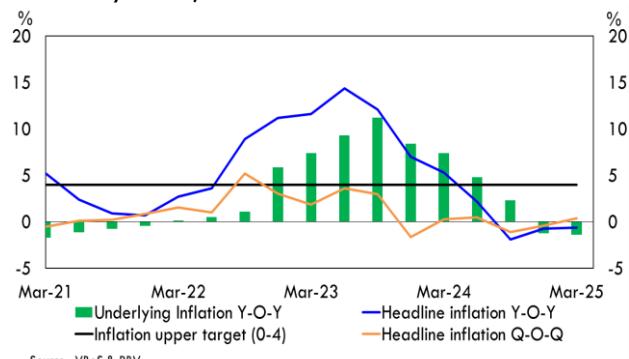

The main expenditure categories contributing to the fall on year-on-year inflation were: housing & utilities (-5.3%), due to a fall on electricity supply charges; communication (-4.7%), reflecting lower repair and maintenance fees; clothing and footwear (-3.6%), driven by a fall in prices of men outwear; education (-2.7%), due to a fall on private school fees and

vocational course fees; and household supplies (-2.5%), reflecting a decline in prices of household and cleaning detergent.

Prices have continued to ease reflecting high peaks experienced in the previous year, the lag effect of the decline on international commodity prices over the year, a slowdown in inflation of Vanuatu's main trading partners, adequate domestic food supplies due to absence of supply shock³ and the appreciation of the Vatu against USD, AUD and NZD.

The underlying inflation rate fell by -1.4 percent and -1.0 percent over the quarter and the same period of the previous year, indicating prices of goods and services, excluding volatile prices such as energy and food, have declined over the two periods.

Figure 10: Consumer Price Inflation (percentage; Quarterly Data)

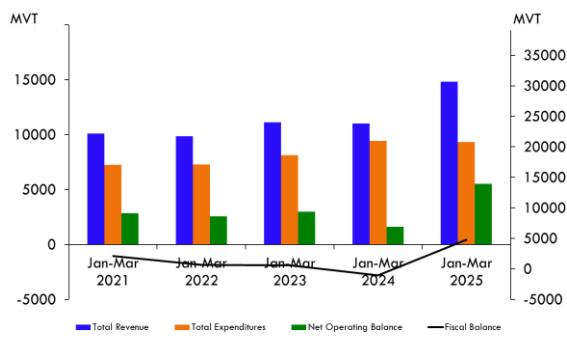

On a quarter-on-quarter basis, headline inflation rebounded slightly by 0.4 percent in the March quarter, following deflation recorded for two consecutive quarters. Port-Vila, Luganville and Lenakel indexes all rose by 0.3 percent, 1.0 percent and 0.7 percent, respectively. The increase was mainly caused by a pick up in prices of food (+1.7%), alcoholic drinks and tobacco (+1.1%) and communication (+4.2%). The main expenditure items recording upsurges in price were: rice, eggs, tobacco and mobile phones. The offsets were reductions in prices for clothing and footwear, education, household supplies, miscellaneous, recreation, housing utilities, health and transport.

3.2 FISCAL DEVELOPMENTS

The Central Government recorded a fiscal surplus in the reviewed quarter, owing to surpluses recorded for both recurrent and donor finance operations. The positive performance reflected the inflows of budget support for the post earthquake recovery, donor inflows for government related projects, steady recurrent revenue collections and lower expenses.

³ Food expenditure contributes approximately 45 percent to the overall CPI basket.

Figure 11: Fiscal Operation
(Jan-Mar Levels)

Source: Department of Finance and Treasury

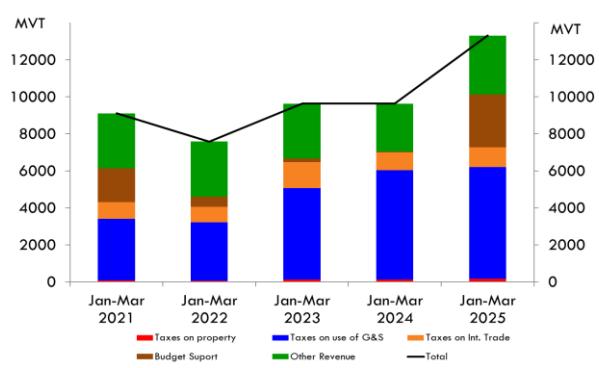

Total revenue⁴ stood at VT14,818.4 million in the reviewed quarter, higher (+34.4%) relative to the same period in 2024. In contrast, total expenses declined by 1.2 percent from the recorded level in the March 2024 quarter, reaching VT9,309.9 million.

Accordingly, the higher levels of revenue collections and lower expenses have resulted in a net operating surplus of VT5,508.5 million. Furthermore, after accounting for the net acquisition of non-financial assets worth VT756.7 million, an overall fiscal surplus of VT4,751.8 million was achieved during the reviewed quarter.

RECURRENT REVENUE

Recurrent revenues performed well in the first three months of 2025 recording VT13,309.0 million; an increase of 38.1 percent relative to the March 2024 quarter. The upward trend reflected the positive performances in taxes on property, taxes on the use of goods & services, taxes on international trade & transaction, grants and other revenue.

Figure 12: Recurrent Revenue
(Jan-Mar Levels)

Source: Department of Finance and Treasury

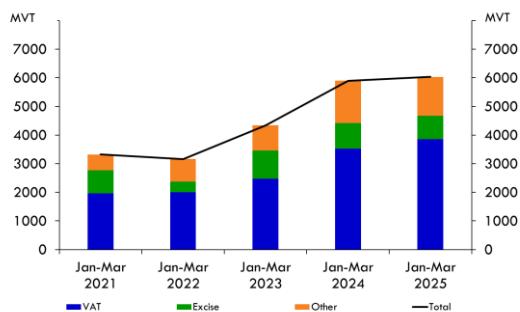

Taxes on the use of goods and services⁵ rose 2.3 percent to VT6,033.3 million. This reflected higher

⁴ Includes recurrent and development budget

⁵ Comprises of Value Added Tax (VAT), Excise Tax and taxes under the category 'Others'

(+9.1%) VAT collections relative to the previous quarter to record VT3,852.2 million. The robust growth in VAT reflected persistent consumption associated with post-earthquake recovery initiatives. In contrast, excise and other taxes (on the use of goods and services) declined by 7.1 percent and 8.5 percent, respectively, relative to the March 2024 quarter.

Figure 13: Taxes on use of Goods and Services
(Jan-Mar Levels)

Source: Department of Finance and Treasury

All other forms of taxes have performed well during the reviewed quarter. Taxes on international trade and transactions⁶ increased by 11.7 percent compared to the same period in 2024, reaching VT1,071.8 million. Other Revenue⁷ recorded a robust growth of 23.1 percent to reach VT3,184.8 million. This mainly reflected higher inflows from the Honorary Citizenship Program (HCP). Taxes on property recorded VT166.8 million, an increase of 27.3 percent relative to the same period in 2024. This reflected further increases in land registration fees during the reviewed quarter.

Budget support totaled VT2,852.3 million in the first quarter of 2025. Majority were inflows of funds for post earthquake recovery efforts.

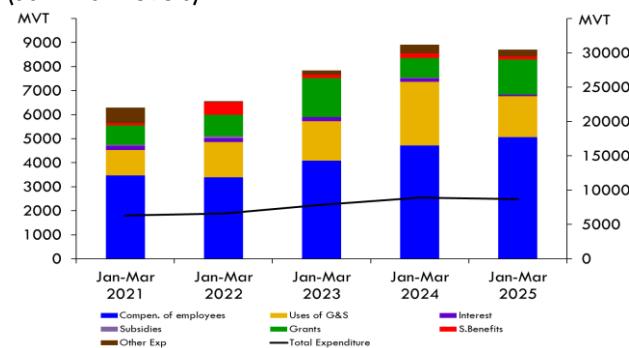

RECURRENT EXPENDITURE

Recurrent expenditure recorded VT8,709.0 million, a decline of 2.3 percent compared to March 2024. The year-on-year trend reflected the decline in spending on the use of goods and services, interest payments, subsidies, social benefits and other expenses. On the other hand, expenses on compensation of employees and grants to grant bodies increased over the year to March 2025.

⁶ Constitute import and export duties

⁷ Constituting fees and charges, approximately 80% of this is the honorary citizenship program fees (Vanuatu Contribution Program (VCP) and Vanuatu Development support program (VDSP)).

Figure 14: Recurrent Expenditure
(Jan-Mar Levels)

Source: Department of Finance and Treasury

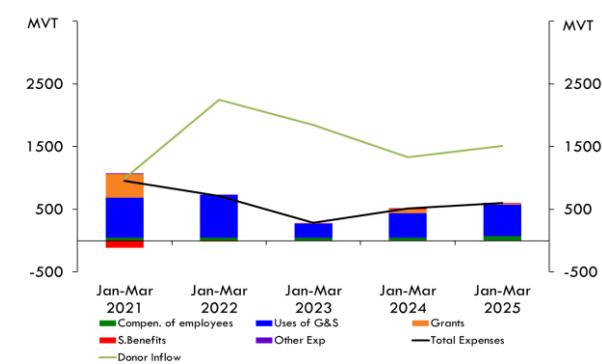

RECURRENT FISCAL BALANCE

The government recorded a net operating surplus of VT4,599.9 million as revenue collections exceeded expenses. After financing the net acquisition of non-financial assets worth VT564.4 million, a recurrent fiscal surplus of VT4,035.6 million was recorded for the reviewed quarter.

DEVELOPMENT BUDGET

Total project grants⁸ received from donor partners amounted to VT1,509.4 million. This level was higher by 13.3 percent relative to the same period in 2024. Similarly, project grant expenses recorded an increase of 17.4 percent to record VT600.8 million, driven by increased spending on compensation of employees and the use of goods and services.

Figure 15: Donor Financing
(Jan-Mar Level)

Source: Department of Finance and Treasury

Since project grants received exceeded expenses, a net operating surplus of VT908.6 million was achieved. Furthermore, after netting out VT192.3 million in net acquisition of non-financial assets, a fiscal surplus of VT716.3 million was realized.

⁸ Only accommodates inflows and outflows of donor project funds recorded by the Government Treasury.

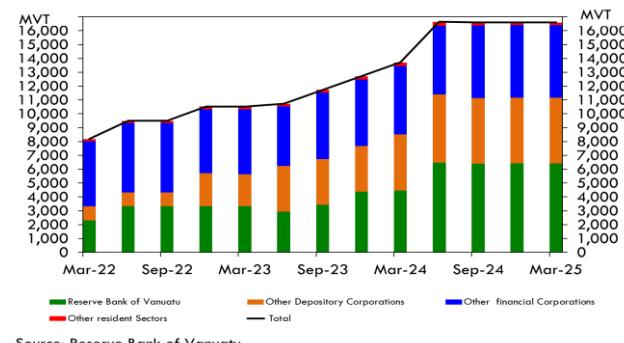

FISCAL FINANCING

The government's (recurrent) net acquisition of financial assets amounted to VT3,364.5 million from January to March 2025. This positive level indicated that the government has increased its financial assets (mainly deposits) during the reviewed period. Furthermore, net incurrence of liabilities recorded a decline of VT671.1 million. This trend reflected a reduction in external liabilities by VT671 million while domestic liabilities remained unchanged.

GOVERNMENT BOND MARKET

Total outstanding domestic bond remained at VT16,592.5 million as previously recorded in the December 2024 quarter. However, this was an increase of 21.0 percent from the level recorded in the March 2024 quarter. In terms of holders, the RBV claimed the largest share of 38.7 percent followed by other financial corporations at 31.6 percent, other depository corporations at 28.6 percent and other residents sector at 1.1 percent.

Figure 16: Outstanding Government Bonds
(Quarterly Level)

3.3 MONETARY DEVELOPMENTS

Monetary Developments

Banking sector activities was moderate in the current quarter as broad money (M2) rose just 0.1 percent to VT128,381.7 million. However, this level was higher by 8.2 percent year-on-year. The quarter-on-quarter growth was attributed to the net foreign assets (NFA), while the year-on-year growth was driven by both net foreign assets and domestic credit. In terms of the components of broad money, the quarter-on-quarter growth reflected the increase in quasi money while the year-on-year growth was due to increases in both narrow money and quasi-money.

Figure 17: Determinants of Money Supply
(Percentage Change; Year-on-Year Growth)

Source: Other Depository Corporations; Reserve Bank

The RBV kept its monetary policy stance unchanged in the March 2025 quarter. The Policy Rate was maintained at 2.75 percent. Simultaneously, the Capital Adequacy Ratio (CAR) was maintained at 12.0 percent; Statutory Reserve Deposit (SRD) at 5.50 percent; and the Liquid Assets Ratio (LAR) at 5.0 percent. Monetary conditions have been supportive of growth, underpinned by high excess reserves and sound capital position of commercial banks.

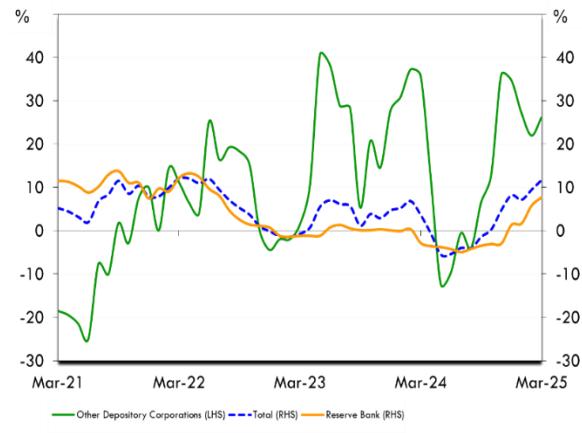

With regards to the monetary policy objectives, official foreign reserves remained above the RBV's minimum threshold of 4 months of import cover. At the end of March, official foreign reserves were sufficient to cover 7.5 months of import. Annual inflation remained below the RBV's inflation target range of 0 to 4 percent. Inflation stood at -0.6 percent in the March 2025 quarter.

Determinants of Money Supply

Net Foreign Assets (NFA)

NFA rose 2.4 percent and 11.7 percent quarter-on-quarter and year-on-year, respectively, to VT94,185.1 million. The quarter-on-quarter growth was driven by net inflows of foreign currencies⁹ to the RBV. Moreover, the year-on-year trend reflected net inflows of foreign currencies via both the RBV and commercial banks. Inflows recorded via the commercial banks reflected robust growth in their foreign asset holdings, while inflows recorded via the RBV reflected post-earthquake recovery funds and returns from investments abroad.

Figure 18: Net Foreign Assets
(Percentage Change; Year-on-Year Growth)

Source: Other Depository Corporations; RBV

Domestic Claim

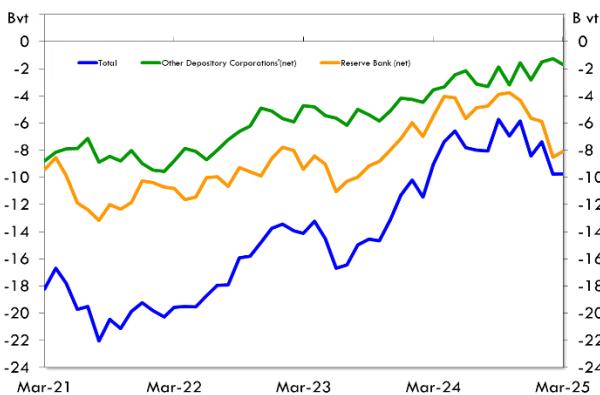

Domestic credit slightly declined by 0.2 percent to VT62,968.0 million. Though remained higher by 7.7 percent relative to the same period in 2024. The slowdown over the quarter reflected the improvement in the government's net credit position with the banking system. The year-on-year growth mirrored the increase in private sector credit.

Private Sector Credit (PSC) grew 1.7 percent quarter-on-quarter and 8.3 percent year-on-year, reaching VT71,119.4 million. The quarter-on-quarter and year-on-year growth reflected credit extended to both businesses and individuals and households. Refer to detailed Private Sector lending under section 3.4; "Banking Sector Developments" for further analysis with respect to sectoral lending of PSC.

The Central Government's net credit position vis-à-vis the banking system improved quarter-on-quarter and year-on-year, respectively. These improvements were attributed to the government's favorable position with the RBV, reflecting significant inflows of funds for post earthquake recovery purposes and the slowdown in domestic borrowing.

⁹ For source of inflows of foreign reserves, do refer to section 4 balance of payment for detailed information.

Figure 19: Net Claims of the Vanuatu Government Vis-à-vis the Total Banking Sector (Levels, Billions of VT)

Source: Other Depository Corporations;RBV

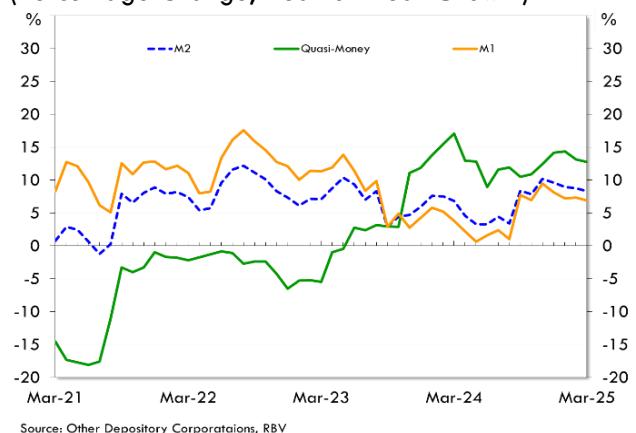

Measures of Money Supply

Money flow into the economy, as represented by narrow Money (M1), stood at VT95,420.7 million, down by 1.1 percent quarter-on-quarter, though it was higher by 6.9 percent year-on-year. Both currency in circulation and transferable deposits fell relative the previous quarter thus attributed to the decline in M1. The opposite movement were noted in both components relative to the previous year.

Currency in circulation stood at VT15,636.8 million, representing a decline by 4.0 percent quarter-on-quarter, but an increase of 14.6 percent year-on-year. The quarter-on-quarter decline reflected the usual slowdown in demand for currency following the seasonal high demand at the end of 2024 and early January 2025; part of the slow demand reflected the closure of Port Vila's CBD following the December 2024 earthquake. The solid growth year-on-year continues to indicate the persistent high demand for currency to support economic activities.

Transferable deposits fell by 0.5 percent to VT79,783.9 million, reflecting the decline in deposits of other non-financial corporation's. However, it increased 5.5 percent year-on-year owing to the accumulation of transferable deposits for the following sectors: other depository corporation, other financial corporations, state and local governments, public nonfinancial corporations and other resident sectors.

Figure 20: Money Supply Components (Percentage Change; Year-on-Year Growth)

Source: Other Depository Corporations, RBV

Quasi-money rose 3.6 percent and 12.7 percent relative to the previous quarter and year, respectively, to VT32,961.1 million. State and local governments, other non-financial corporations, and other resident sectors have accumulated interest bearing deposits during current quarter thus attributed to the quarter-on-quarter trend. Moreover, the year-on-year growth reflected increases in interest-bearing deposits of other non-financial corporations and other resident sectors.

Interest Rates

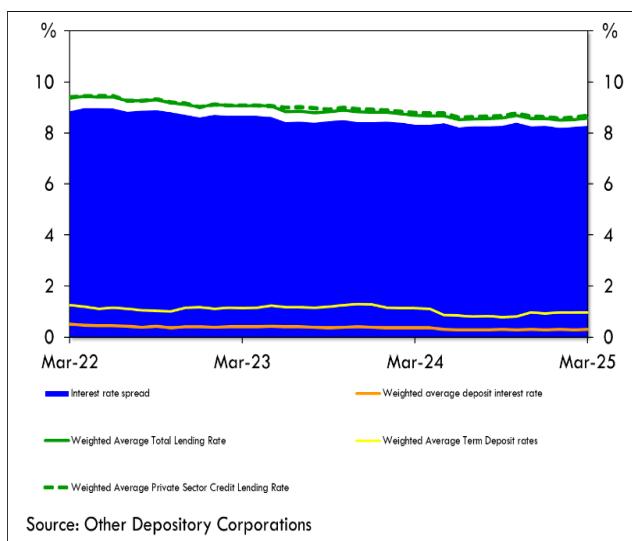

Interest rates remained stable over the quarter but eased on the year on year, reflecting the decline in interest rate spread over the year to March 2025.

The weighted average interest rates on total deposits slightly increased by 0.03 percentage points quarter-on-quarter to 0.31 percent, however, this is lower by 0.06 percentage points, relative to the same period in 2024. Similarly, the weighted average interest rates on fixed deposits rose by 0.03 percentage points over the quarter but declined by 0.18 percentage points year-on-year to 0.96 percent.

Weighted average interest rates on total lending increased by 0.03 percentage points quarter-on-quarter, but fell by 0.11 percentage points year-on-year to 8.56 percent in the March 2025 quarter.

The interest rate spread remained virtually unchanged over the quarter, as a result of the increase in both weighted average interest rates on total deposits and total lending. However, the interest rate spread narrowed by 0.05 percentage points relative to the same period in 2024.

Figure 21: Interest Rate
(Percent, Month-End Rates)

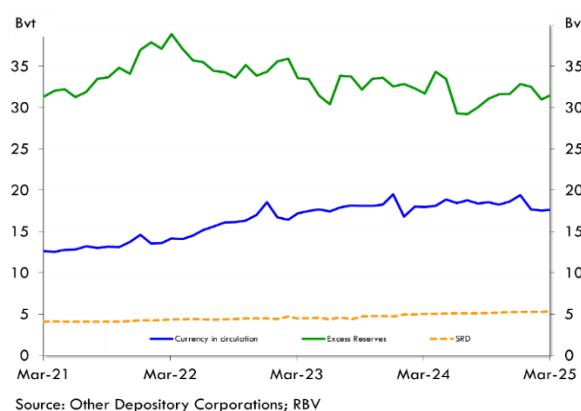

Monetary Base (MO)¹⁰

Monetary base reached VT56,054.9 million, lower by 5.4 percent quarter-on-quarter, but higher by 2.8 percent year-on-year. The movement during the quarter was attributed to declines in currency in circulation¹¹ and excess reserves. Relative to a year ago, both currency in circulation and statutory reserve deposits (SRD) had increased thus attributed to the annual growth.

SRD rose by 1.7 percent and 6.8 percent quarter-on-quarter and year-on-year, respectively, to VT5,371.5 million. However, excess reserves declined by 4.0 percent and 0.4 percent over the quarter and by 0.42 percent year-on-year, reaching VT31,555.9 million.

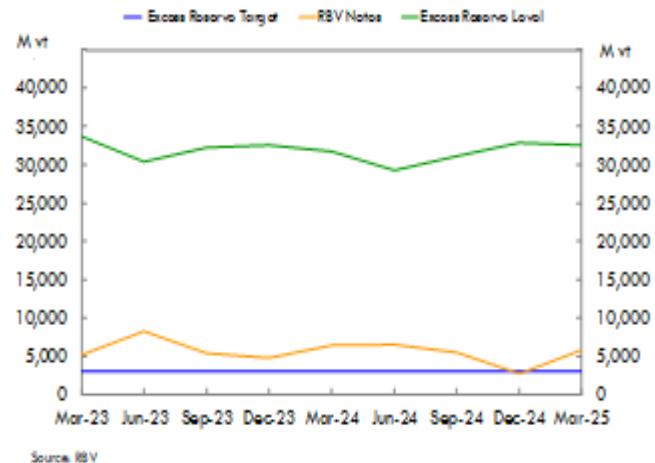

Figure 22: Components of Reserve Money
(Levels; Billions of VT)

MONEY MARKET DEVELOPMENT

Commercial banks' excess reserves decreased to VT32,515.7 million in the current quarter, from VT32,873.9 million in the fourth quarter of 2024. This development was caused by offsetting movements in the determinants of excess reserves, of which, the bulk of the decrease was attributed to increased issuance of RBV notes.

Figure 23a : Bank Excess Reserves
(Levels, Millions of Vatu, Month-End Data)

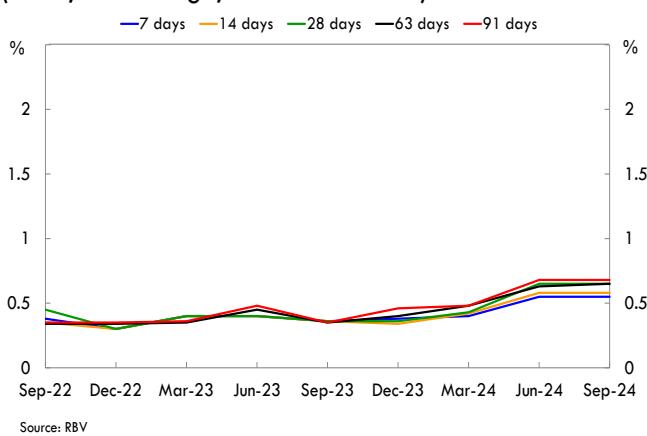

Total outstanding RBV Notes increased from VT2,840.0 million in the preceding quarter to VT5,775 million. During the review period, the RBV floated VT18,900 million in RBV Notes and received a total of VT16,640 million in bids from commercial banks, of which, it allotted VT14,320 million to the successful bidders.

RBV Notes allotments during the review quarter were as follows: VT3,125 million was allotted to the 7 days, VT3,960 million was allotted to the 14 days, VT2,610 million was allotted to the 28 days, VT2,425 million was allotted to the 63 days and VT2,200 million was allotted to the 91 days maturity.

¹⁰ Base money or 'Reserve Money' is made up of currency in circulation, Statutory Reserve Deposits (SRD) and Excess Reserves.

¹¹ Refer to currency in circulation under the narrow money for more information pg 15.

Figure 23b : RBV Notes Yields
(Level, Percentage, Month-End Data)

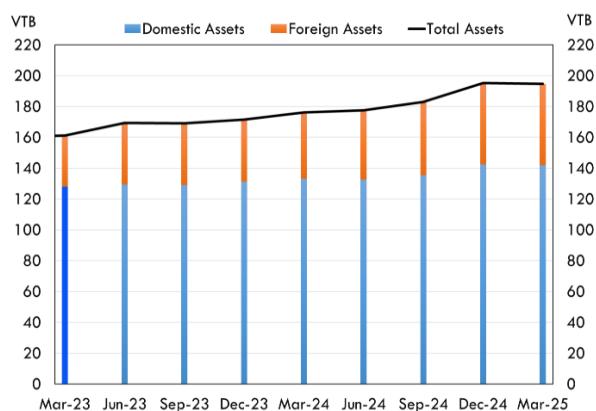

The interest rates on all categories of RBV Notes have remained unchanged as shown in figure 23b. Between the various categories of RBV Notes, the 7 days Notes interest rates remained at 0.60 percent, 14 days (0.65%), 28 days Notes (0.63%), 63 days Notes (0.65%) and the 91 days RBV (1%).

3.4 BANKING SECTOR DEVELOPMENTS

Domestic Banks

Financial Position

Figure 24: Asset Position – Domestic Banks
(Levels; Billions of Vatu)

The domestic banking industry's balance sheet recorded a slight decline of 0.3 percent this quarter to VT194.8 billion; however, recorded year on year growth of 10.6 percent. This quarterly decline mainly reflected decrease in total domestic assets by 0.6 percent to VT141.8 billion, although total foreign assets increased by 0.5 percent to VT53.0 billion. Annually, both domestic and foreign assets recorded growths of 6.4 percent and 23.5 percent, respectively.

Total domestic assets declined over the quarter as cash (VUV), claims on RBV, claims on central government and other local government, claims on financial institutions and claims on non-financial institutions declined by 27.8 percent to VT3.5 billion, 3.5 percent to VT45.2 billion, 0.03 percent to VT5.0 billion, 12.6 percent to VT8.1 million, 10.3 percent to VT155.3 million and 2.3 percent to VT1.3 billion, respectively. On the other hand, claims on other financial corporations, private sector and other domestic assets rose 16.6 percent to VT272.8 million, 1.7 percent to VT70.8 billion and 7.3 percent to VT15.5 billion correspondingly, during the quarter. Year-on-year, apart from cash (VUV), claims on other local government, other financial corporations and non-financial institutions which decreased by 13.6 percent, 37.9 percent, 31.1 percent and 6.4 percent respectively, all else increased: claims on RBV by 5.9 percent, central government by 18.7 percent, financial institutions by 113.5 percent, private sector by 8.4 percent and other domestic assets by 5.6 percent.

The domestic assets of the banking industry are comprised of claims on private sector (36.4 percent), claims on RBV (23.2 percent), other domestic assets (7.9 percent), claims on central government (2.6 percent), cash (VUV) (1.8 percent), claims on non-financial institution (0.7 percent), claims on other financial corporations (0.1 percent), financial institution (0.1 percent) and claims on other local government (0.01 percent).

The increase in foreign assets this quarter was largely attributed to increase in claims on non-residents by 6.1 percent to VT16.0 billion, even though foreign currency cash decreased by 1.6 percent to VT1.2 billion and balances with financial institutions abroad fell by 1.7 percent to VT35.9 billion. Yearly, both balances with financial institutions abroad and claims on non-residents grew by 25.5 percent and 21.4 percent while foreign currency cash declined slightly by 1.7 percent.

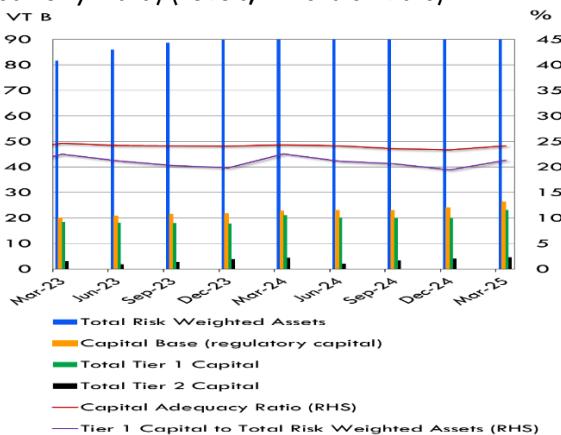

Capital Adequacy

The domestic banking industry remains well capitalized with a capital adequacy ratio (CAR) of 24.1 percent at the end of the quarter. This is slightly higher than December 2024 (23.3 percent) and close to March 2024 (24.3 percent) and is well above the minimum requirement of 12.0 percent.

The rise in CAR was mostly attributed to 9.3 percent expansion in capital base to VT26.3 billion even though total risk weighted assets (TRWA) also increased by 5.7 percent to VT108.9 billion. Over the year, capital base grew by 15.5 percent and TRWA grew by 16.4 percent.

The growth in capital base was mainly due to 16.1 percent increase in tier 1 capital to VT23.2 billion, reflecting increase in retained earnings. Tier 2 capital declined by 47.7 percent quarter-on-quarter to VT2.4 billion, reflecting only current quarter profits. Over the year both tier 1 and tier 2 capital rose by 9.9 percent and 15.1 percent, respectively.

**Figure 25: Capital Adequacy & Tier 1 Ratio
(Quarterly Data) (Levels, Billions of Vatu)**

During the quarter, TRWA increased mainly due to increases in on-and-off balance sheet risk weighted assets and in operational risk assets by 3.8 percent to VT98.2 billion, 21.1 percent to VT1.6 billion and 18.3 percent to VT10.7 billion, respectively. Year-on-year saw increases in all categories of risk assets by 15.8 percent (on balance sheet RWA), 9.3 percent (off-balance sheet RWA) and 18.3 percent (operational RWA).

Financial Performance

The industry's financial performance remains satisfactory, reflecting on-going economic recovery from the pandemic, natural disasters and post-earthquake reconstruction. During the quarter, underlying profits were VT1.2 billion, down by 1.7 percent from last quarter and 12.5 percent from a year ago. This decline was mostly due to 1.9 percent decrease in total operating income to VT3.3 billion despite the 1.9 percent decrease in total operating expenses. Over the year, both operating income and expenses increased by 7.4 percent and 23.7 percent respectively.

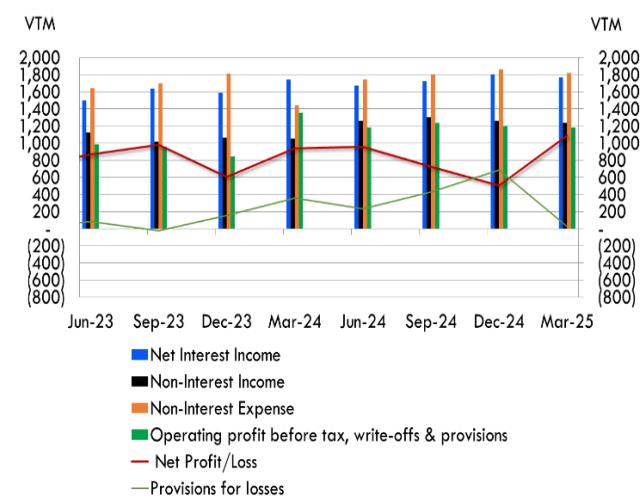

Interest income fell by 1.9 percent over the quarter to VT2.0 billion, however rose 1.8 percent year-on-year. Interest expense remained almost flat, with a slight quarterly decline of 0.01 percent to VT248.1 million, however increased yearly by 6.8 percent. As a result, net interest income was VT1.8 billion, a quarterly decline of 2.1 percent, however a 1.1 percent increase over the year. Non-interest income declined over the quarter by 1.8 percent to VT1.2 billion, however was

an increase of 17.8 percent over the year. Non-interest expense declined 2.2 percent over the quarter to VT1.8 billion; however, a yearly increase of 26.5 percent.

Despite favourable economic indicators, the industry maintained prudent provisions for credit risks. Specific provisions expense for loan losses was VT282.2 million, decline of 22.5 percent for the quarter, however, increased by 0.9 percent over the year. In contrast, general provisions expense was negative VT258.6 million, reflecting a decrease both in the quarter (down 189.9 percent) and the year (down 436.9 percent). Specific provisions expense for other losses was zero, down from VT36.3 million last quarter and unchanged over the year. Therefore, the industry recorded a net profit of VT1.1 billion compared to VT505.6 million in the previous quarter and VT940.8 million in the same quarter of the previous year.

The above financial performance resulted in decline in profitability ratios; annualised Return on Assets (ROA) was 0.8 percent (2.3 percent: Dec-24; 2.2 percent: Mar-24), and annualised Return on Equity (ROE) was 5.5 percent (16.2 percent: Dec-24; 15.4 percent: Mar-24). Furthermore, interest margin to gross income was stable at 58.8 percent, unchanged from last quarter, however, was below 62.4 percent in the previous year. In contrast, the non-interest expense to gross income ratio rose to 60.7 percent (57.9 percent: Dec-24; 51.5 percent: Mar-24).

**Figure 26: Earnings – Domestic Banks
(Quarterly Data) (Levels, Millions of Vatu)**

Asset Quality

The quality of the industry's loan book improved further over the quarter and year as non-performing

loans (NPLs¹²) declined quarterly by 9.3 percent and yearly by 21.9 percent to VT11.6 billion. Total NPLs to gross loans¹³ ratio fell to 13.1 percent compared to the previous quarter and year (14.8 percent: Dec-24, 18.4 percent: Mar-24). Net NPLs to capital ratio is still elevated however declined over the quarter and year to 32.4 percent (40.3 percent: Dec-24; 53.1 percent: Mar-24). This is the result of increased provisioning and capital over the quarter alongside the reduction in NPLs.

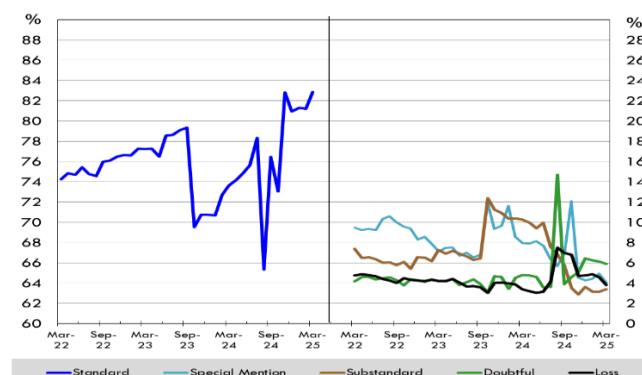

Majority (86.9 percent) of the lending book remained as performing loans, i.e., standard and special mention loans. Standard loans rose over the quarter and year by 4.8 percent and 23.7 percent, respectively, to VT73.4 billion. Whilst special mention loans decreased quarterly by 2.9 percent to VT3.6 billion and annually by 44.0 percent. The movements within these performing loan categories resulted mainly from increase in credits and reclassification of loans.

For the higher credit risk categories, substandard loans declined over the quarter by 3.8 percent to VT3.0 billion, a yearly reduction of 63.8 percent. In contrast, doubtful loans dropped over the quarter by 6.2 percent to VT5.2 billion, an annual increase of 35.5 percent. Loss loans stand at VT3.4 billion, a 17.7 percent fall over the quarter, however, an increase of 24.1 percent over the year.

General provisions declined over the quarter by 8.5 percent to VT2.9 billion; however, increased slightly by 0.1 percent over the year. On the other hand, specific provisions grew by 6.3 percent over the quarter and 23.9 percent over the year to VT3.3 billion.

Specific provisions to NPLs stood at 28.4 percent (24.2 percent: Dec-24; 17.9 percent: Mar-24) while general provisions to gross loans was 3.3 percent (3.6 percent: Dec-24; 3.6 percent: Mar-24).

Figure 27: Asset Quality – Domestic Banks
(Share of Total Loans, By Loan Category)

¹²Include loans & advances classified as Substandard, Doubtful & Loss

¹³Loans & Advances to both residents & non-residents

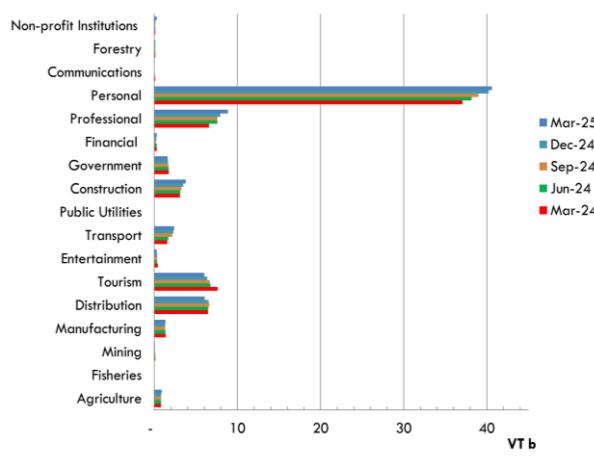

Private Sector Lending

The private sector credit¹⁴ (PSC) showed steady growth, up by 1.6 percent over the quarter and 7.7 percent over the year to VT72.7 billion. The expansion is attributed to general increase in demand for credits within the economy despite banks continuing to maintain tight book management. Major sectors contributing to the increase during the reviewed quarter includes: agriculture (8.9 percent to VT0.9 billion), manufacturing (3.2 percent to VT1.4 billion), transport (4.9 percent to VT2.4 billion), construction (9.3 percent to VT3.8 billion), professional & other (11.5 percent to VT8.9 billion) and personal (0.9 percent to VT40.6 billion).

In contrast, the following major sectors depicted quarter-on-quarter declines: government (2.1 percent to VT1.6 billion), distribution (6.9 percent to VT6.1 billion) and tourism (5.6 percent to VT6.0 billion).

Private sector credits continue to be concentrated in personal (55.8 percent), professional & other (12.2 percent), distribution (8.4 percent), tourism (8.3 percent) and construction (5.2 percent) sectors.

Figure 28: Private Sector Credit Domestic Banks
(Quarterly Data, Levels, Billions of Vatu)

Liquidity Position

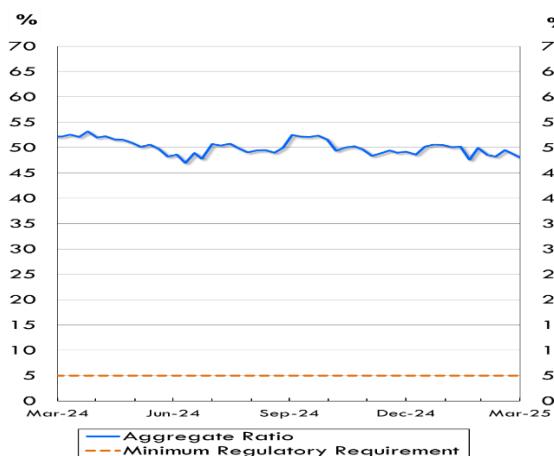

The domestic banking industry's liquidity position remained high with a liquid asset ratio (LAR) of 48.7 percent at the end of March 2025 (49.2 percent: Dec-24; 52.3 percent: Mar-24) well above the minimum regulatory requirement of 5 percent.

Vatu liquid assets increased slightly by 0.1 percent over the quarter to VT44.4, however, was an annual decline of 3.3 percent. Even so, holdings remain well

¹⁴Exclude credits to non-residents

above the required threshold of VT6.4 billion, with an excess of VT38.0 billion. Customer deposits continued to be the core source of funding during the reviewed period.

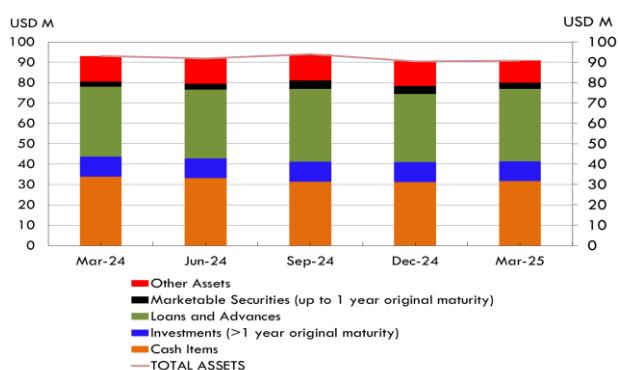

Figure 29: Liquid asset ratio –Domestic Banks

International Banks

Financial Position

Figure 30: Offshore Banking Industry – Total Assets (Millions of USD, Quarterly Data)

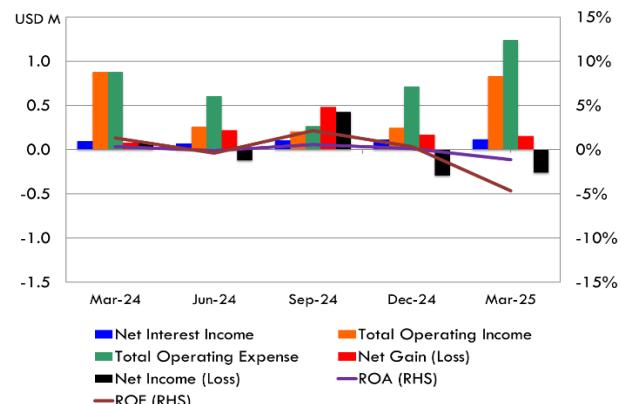

The international banking industry's total assets increased over the quarter, however, fell year-on-year by 2.4 percent to USD90.8 million at end of March 2025. The quarterly growth is driven by the increase in; cash item and loans & advances by 1.3 percent to USD31.6 million and 6.5 percent to USD35.6 million, respectively. In contrast, marketable securities, investments, and other assets fell over the quarter by 22.4 percent to USD3.0 million, 0.6 percent to USD9.6 million and 10.7 percent to USD10.9 million respectively.

Similarly, total liabilities (less capital) grew quarter-on-quarter by 2.5 percent and fell year-on-year by 0.9 percent to USD69.1 million. The quarterly growth is attributed to increase in deposits by 4.6 percent to USD63.6 million. In contrast, term debt & other borrowings, accrued liabilities and other liabilities

declined over the quarter by 68.5 percent to USD469 thousand, 0.9 percent to USD4.8 million, and 10.1 percent to USD 232 thousand, respectively.

Financial Performance

Figure 31: Offshore Banking Industry Earnings (Millions of USD & Percent; Quarterly Data)

The offshore banking industry was unprofitable at the end of the reviewed quarter, reporting a net loss of USD261 thousand compared to same quarter in 2024.

Interest income grew quarter-on-quarter by 5.4 percent to USD194 thousand and interest expense also grew by 8.3 percent to USD78 thousand.

Non-interest income fell quarter-on-quarter and year-on-year by 31.6 percent and 11.5 percent, respectively, to USD634 thousand, attributed to lower services charges, commission and fees.

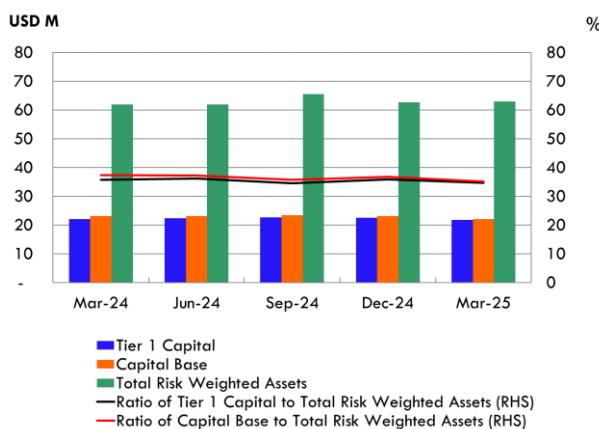

Similarly, non-interest expense also fell quarter on quarter by 46.5 percent while grew year on year by 43.2 percent to USD828.0 thousand. The quarterly decline is driven mostly by fall in personal expenses, premises and fixed asset expenses and other operating expenses.

Due to these movements in income, both ROA and ROE ratios were negative; ROA was -0.6 percent and ROE was -2.3 percent.

Capital

The international banking industry remains well capitalised although the capital adequacy ratio (CAR) fell by 4.4 percentage points to 35.1 percent, still well above the regulatory requirement of 12 percent. The decline was driven by both increase in risk weighted assets and decline in capital base.

Figure 32: Offshore Banking Industry – Capital (Millions of USD & Percent; Quarterly Data)

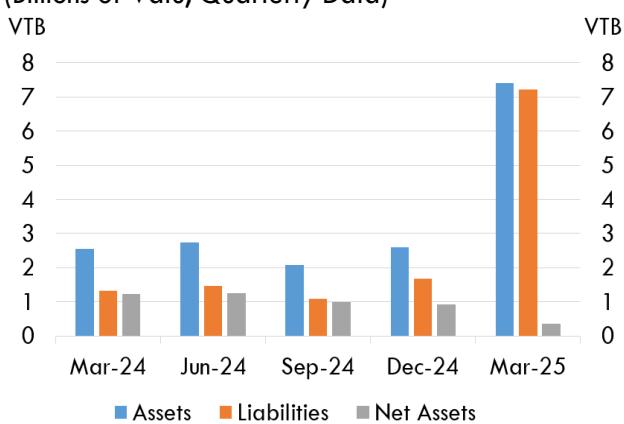

Tier 1 capital dropped over the quarter by 3.1 percent to USD21.8 million, attributed mostly to increase in accumulated retained losses by 6.7 percent of USD8.6 million and further increase in current quarter/year unaudited losses of USD745 thousand. Total risk weighted assets increased by 0.4 percent to USD62.8 million, attributed to increase in risk weighted on-and-off-balance sheet assets. On the other hand, operational risk assets declined over the quarter by 26.3 percent to USD2.2 million.

3.5 INSURANCE SECTOR DEVELOPMENTS

INSURANCE SECTOR DEVELOPMENTS

Domestic Insurers

Figure 33: Financial Position
(Billions of Vatu, Quarterly Data)

Total admissible asset for the reviewed period grew significantly by 186 percent to VT7.4 billion (VT2.58 billion: Dec-24). This growth is attributed largely to increases in Amounts due from reinsurers by 7099 percent to VT5.1 billion (VT71.9 million: Dec-24). Other assets which includes prepayments and VAT

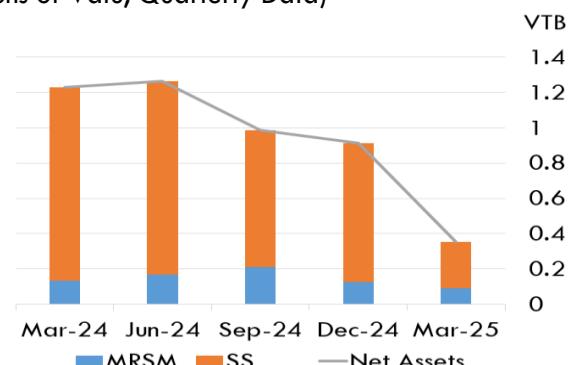

receivables also increased significantly by 2313 percent to VT223 million (VT9.2 million: Dec-24). The spike in assets is driven by inflow of reinsurance funds towards settlement of earthquake claims. Other asset components with reported reductions are; Cash on hand which dropped by 8 percent to VT1.6 billion (VT1.7 billion: Dec-24) and premiums receivable by 11 percent to VT373 million (VT419 million: Dec-24). Amounts due from reinsurers is the major component of total assets, comprising 70 percent, followed by Cash on hand & deposits at 22 percent.

Total Insurance liabilities increased significantly by 331 percent to VT7.2 billion (VT1.67 billion: Dec-24). The increase was driven by a spike in gross outstanding claims by 720 percent to VT5.7 billion (VT704 million: Dec-24). Other liability components with similar increases are; Amounts due to related parties by 31876 percent to VT353 million (VT1.1 million: Dec-24); claims incurred but not reported (IBNR) by 239 percent to VT253 million (VT74 million: Dec-24) and Catastrophe claim retention by 278 percent to VT13 million (VT3.4 million: Dec-24).

In contrast, liability components which have declined are; Contingency by 79 percent to VT7.2 million (VT34.1 million: Dec-24), Payables & other liabilities by 54 percent to VT174 million (VT378 million: Dec-24) and CAE by 42 percent to VT1.6 million (VT2.7 million: Dec-24). Gross outstanding claims is the major component under liabilities comprising 82 percent of total liabilities.

In comparison to the same quarter of 2024, the industry total assets increased by 186 percent to VT7.4 billion (VT2.5 billion: Mar-24). The total liabilities also increased by 331 percent to VT7.2 billion (VT1.3 billion: Mar-24).

Figure 34: Margin of Solvency
(Billions of Vatu, Quarterly Data)

MRSM – Minimum Required Solvency Margin

SS – Solvency Surplus

The total domestic solvency position declined by 61 percent to VT353 million (VT913 million: Dec-24). The required minimum solvency also declined by 26 percent to VT92 million (VT123 million: Dec-24).

The solvency surplus (after deduction of the minimum required solvency margin) increased significantly by 67 percent to VT261 million (VT789 million: Dec-24).

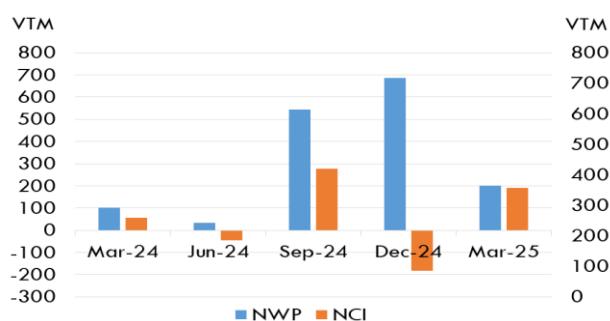

Domestic Industry Performance

Gross Premium (GP)

The total gross premium declined by 66 percent to VT271 million (VT801 million: Dec-24). Net Written premium declined by 71 percent to VT200 million (VT686 million: Dec-24). The decrease in net written premium is due to an increase in reinsurance expense in this quarter. Reinsurance premium declined by 38 percent to VT71.6 million (VT115 million: Dec-24).

Figure 35: Net Written Premium and Net Claims Incurred

(Millions of Vatu, Quarterly Data)

NWP-Net Written Premium NCI-Net Claim Incurred

Claims

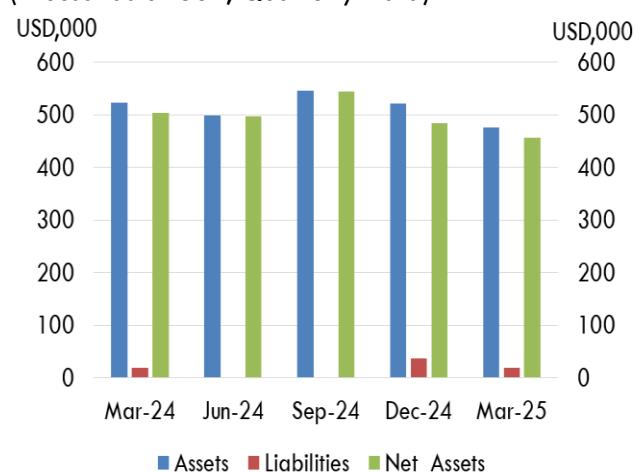

Gross claims incurred declined significantly by 108 percent to VT471 million (-VT5.8 billion: Dec-24). Gross claims comprises current & historical claims, claims paid and adjustments made in provisioning for these claims.

Net claim incurred declined by 204 percent to VT190 million (-VT182 million: Dec-24). This figure reflects the movement in paid claims and associated costs during the reporting quarter.

International Insurers

Figure 36: Financial Position

(Thousands of USD, Quarterly Data)

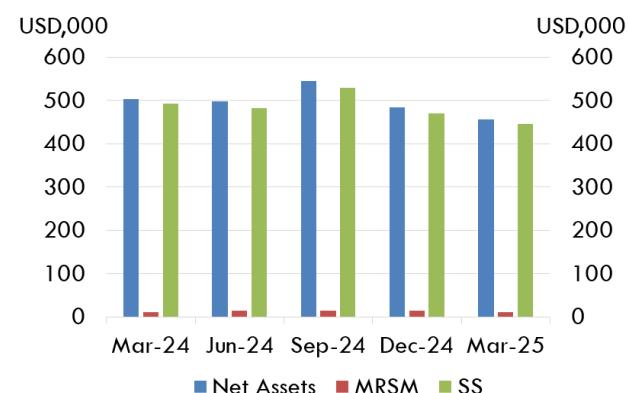

The total admissible asset for the international market declined by 9 percent to USD 475 thousand (USD521 thousand: Dec-24). Cash on hand and bank deposits is the main component under total assets.

Total liabilities in the international market decline by 48 percent to USD19.6 thousand (USD37 thousand: Dec-24). This is attributed to the decrease in unexpired risk by 48 percent to USD17.8 thousand (USD35.6 thousand: Dec-24). IBNR which comprises of 6 percent of the total liabilities remain constant at USD1.24 thousand (USD1.24 thousand: Dec-24).

In comparison to the same quarter of last year, total assets declined by 9 percent to USD475 thousand (USD522 thousand: Mar-24). Total liabilities have remained constant at USD19.6 thousand (USD19.6 thousand: Mar-24).

Figure 37: Margin of Solvency

(Thousands of USD, Quarterly Data)

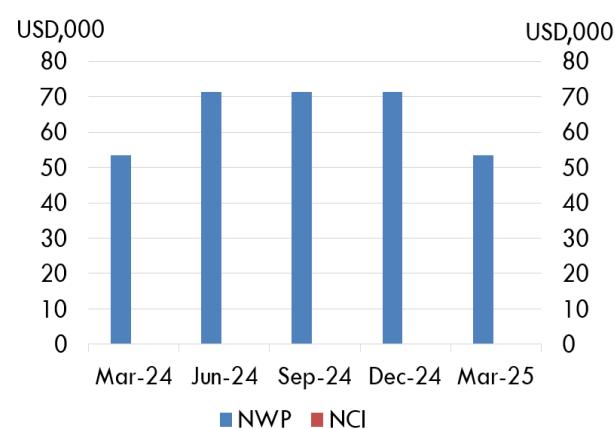

MRSM - Minimum required solvency margin
SS - Solvency Surplus

Solvency position decreased by 6 percent to USD456 thousand (USD484 thousand: Dec-24). Minimum required solvency also declined by 25 percent to USD10.7 thousand (USD14.3 thousand: Dec-24). Solvency surplus decline by 5 percent to USD445 thousand (USD469 thousand: Dec-24).

Figure 38: Business Performance

(Thousands of USD, Quarterly Data)

NWP-Net Written Premium

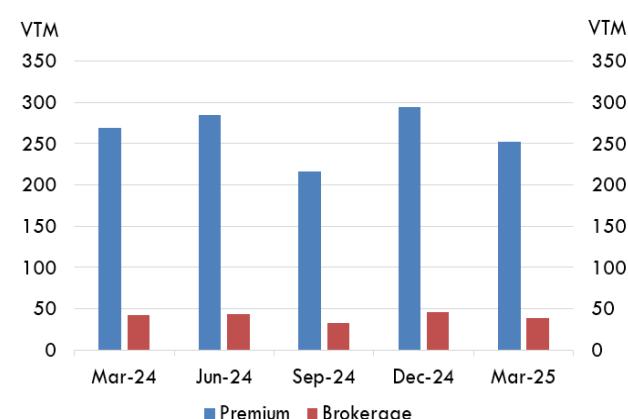

NCI-Net Claim Incurred

Net written premium declined by 25 percent to USD53.4 thousand (USD71.3 thousand: Dec-24). There were no reported Net claims incurred during the reporting quarter which reflects no reported gross claims incurred. Year-on-year comparison, shows net written premium remain constant at USD53.4 thousand (USD53.4 thousand: Mar-24).

Insurance Broker Overview

Figure 39: Domestic Broker Business

(millions of Vatu, Quarterly Data)

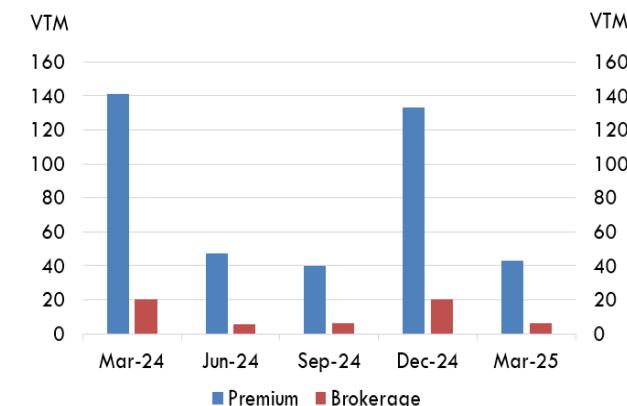

The total premium transacted for the domestic market through brokers declined by 14 percent to VT252 million (VT294 million: Dec-24). This reduction is attributed to a decrease in policy renewals and new businesses written in this quarter. Total brokerage commission declined by 18 percent to VT28 million (VT46 million: Dec-24) reflecting the decline in total premiums.

In comparison to the same quarter of 2024, total premium declined by 6 percent to VT252 million (VT268 million: Mar-24). Brokerage also declined by 18 percent to VT38 million (VT46.4 million: Mar-24).

Figure 40: Offshore Broker Business

(Millions of Vatu, Quarterly Data)

Total premium remitted offshore through brokers dropped by 68 percent to VT42.9 million (VT133 million: Dec-24). This decline is attributed to a decline in policy renewals and new businesses written from the following class: Professional Indemnity, Public /Product Liability, Marine Hull & Liability, and comprehensive crime. Total brokerage commission also decreased by 70 percent to VT6.1 million (VT20.1 million: Dec-24).

In comparison to the same quarter of 2024, the premium had declined by 70 percent to VT42 million (VT141 million: Mar-24). Brokerage also decrease by 69 percent to VT6.1 million (VT20 million: Mar-24), both indicating decrease in offshore business over the year.

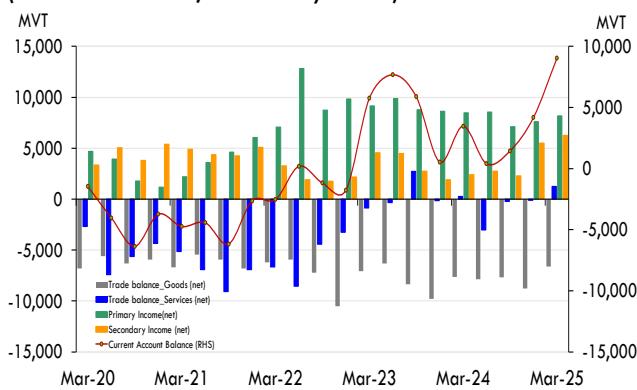

4. EXTERNAL SECTOR DEVELOPMENTS

4.1 BALANCE OF PAYMENTS¹⁵

Vanuatu's revised current account balance (CAB) is estimated to further improved by 102.3 percent in the current quarter. This further improvement reflected reduced outflows outweighing reduced inflows. These developments stemmed from improvements in the trade in services balance, primary income balance and secondary income balance, outweighing a worsening trade in goods balance deficit.

The capital and financial accounts decelerated in the reporting period following increases experienced over the previous period.

Figure 41: Vanuatu's Current Account Balance
(Millions of Vatu, Quarterly Data)

Trade in Goods and Services

The trade in goods balance deficit narrowed by 24.8 percent over the reviewed period, driven by a contraction in imports of goods outweighing the decline in goods exports.

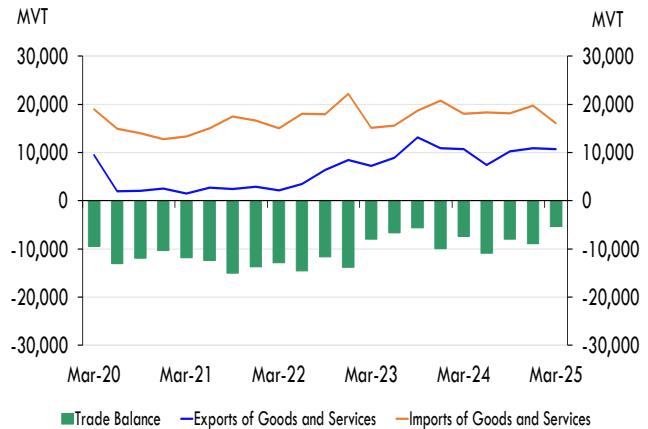

Goods exports declined by 32.4 percent, mainly driven by reductions in exports for cocoa (-28.0 percent), timber (-41.9 percent), kava (-38.9 percent) and other products (-22.4 percent). By exporting countries, decreased exports were recorded for: Australia (-25.9%), New Caledonia (-52.9%), New Zealand (-26.6%), MSG countries (-9.2%) and other countries (-37.8%). Exports to the European Community rose 31.9 percent. The changes in exports development were mainly driven by seasonal trends,

commodity production capacity, export prices and demand for Vanuatu's goods abroad.

Imports of goods from abroad declined by 26.5 percent, driven by the following categories: food and live animals (-47.7%), basic manufactured products (-9.7%), and mineral fuels (-27.1%). Crude materials and machinery and transport equipment increased by 62.9 and 8.6 percent, respectively. By country of consignment, decreased imports were reported from the following countries; Australia (-24.0%), New Zealand (-10.5%), Fiji (-31.0%), Japan (-42.4%), France (-1.0%), Singapore (-31.7%) and other countries (-29.0%). Increased imports were noted for New Caledonia (129.3%) and Hong Kong (0.8%). Changes in imports development over the period were attributed to seasonal patterns, foreign commodity prices and demand for foreign goods.

The revised trade in services balance was estimated to have improved significantly mainly due to the increase in services receipts (8.5%), outweighing the decrease in services payments (6.1%). Service receipts increased by 8.5 percent mainly driven by travel receipts (9.4%), telecommunication service receipts (23%) and financial services receipts (10%). Conversely, service payments decreased by 7.8 percent driven mainly by and transports services (-27.0%), and other business services payments (-28.2%).

Figure 42: Trade in Goods and Services
(Millions of Vatu, Quarterly Data)

Primary Income Account

The revised primary income balance improved by 7.4 percent, as the reduction in the primary income

¹⁵ The March Quarter 2025 Balance of Payments estimates include historical revisions to enhance data accuracy and reliability.

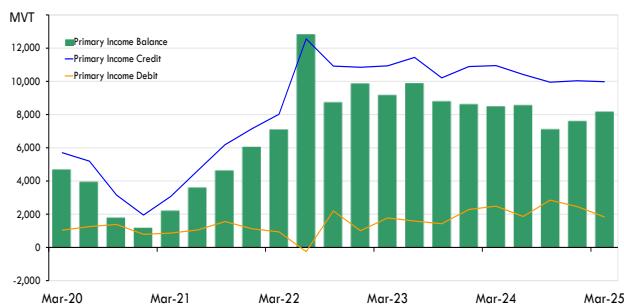

Key revisions made are: adding Pacific Australia Labor Mobility (PALM) short-term workers' earnings and refining Travel model parameters using recent visitor survey reports from New Zealand Tourism Research Institute (NZTRI) and Pacific Tourism Organization (PTO).

These revisions have enhanced the Current Account by incorporating official PALM data, improving estimates of short-term PALM workers and increasing employee compensation figures. Tourism estimates now rely on NZTRI and SPTO survey data, along with up-to-date visitor statistics from Vanuatu Bureau of Statistics (VBoS). Visitor daily expenditure has steadily increased from 2022 to 2024, influencing updated travel spending calculations. These changes have led to significant revisions in travel and income estimates for 2022–2025.

payments outweighed the reduction in primary income receipts.

Primary income receipts (credit) decreased by 0.6 percent over the reviewed period, owing to a 47.9 percent drop in investment income (in particular income on reserve assets investments abroad). Compensation of employees (COE) abroad moderated in the first three months. Primary income payments (debit) decreased by 25.5 percent driven mainly by reduction in investment income outward payments (-37.1 %).

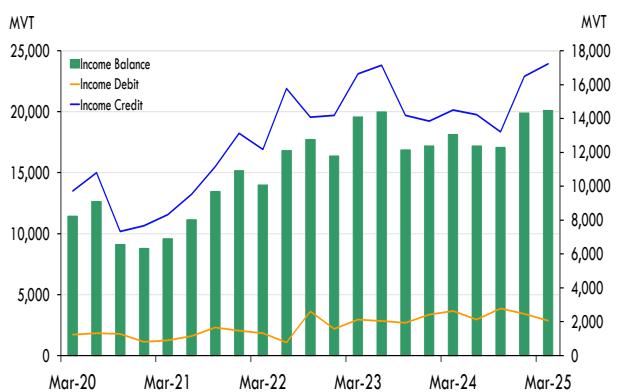

Figure 43: Primary Income Account
(Millions of Vatu, Quarterly data)

Secondary Income Account

The secondary income balance declined by 8.4 percent, attributed mainly to reductions in inward transfers. The inward transfers declined by 8.9 percent as transfers to both the government (i.e. citizenship fees) and non government sectors declined. Outward transfers also declined by 10.8 percent reflecting reduced outward transfers from the non government sector as opposed to the Government sector.

Figure 44: Primary and Secondary Income Account
(Millions of Vatu, Quarterly data)

Capital Account¹⁶

Capital net balance decreased by 51.4 percent relative to the December quarter, mainly reflecting the moderate growth in bilateral and multilateral capital funding.

Financial account

Financial account net balance decreased by 34.2 percent, driven mainly by weaker growth of external assets (-66.4%).

The RBV's net official foreign reserves amounted to VT 75,095 million (\$617 million USD). Higher by 3.5 percent and 7.4 percent quarter on quarter and year-on-year, respectively. This remained adequate to finance approximately 7.4 months of import cover.

4.2 EXCHANGE RATE DEVELOPMENTS¹⁷

Over the reviewed period, the Vatu appreciated against the USD, AUD and NZD by 1.5 percent, 0.4 percent and 0.2 percent while it depreciated against the EURO by 2.5 percent. The quarter on quarter average trend saw the Vatu appreciated against the USD and AUD by 0.4 percent and 1.2 percent. The year-on year average movement indicated that the Vatu depreciated against the USD by 2.1 percent and appreciated against the AUD by 1.8 percent.

Source: RBV

¹⁶ The capital account generally reflects gross disposals of nonproduced nonfinancial assets in the form of funds and aid in kind to the government and other sectors.

¹⁷ The movements of the Vanuatu Vatu currency vis-à-vis the major currencies over the reviewed quarter reflected developments in the economic and financial conditions of Vanuatu and its major trading partners. An appreciation of Vatu against its major trading currencies is beneficial for the Vanuatu economy as resident importers will need less Vatu currency to purchase foreign goods or

services in foreign currency terms. Conversely, a depreciation of Vatu against its major trading currencies could be costly for Vanuatu's consumers, importers and institutions that have investments in Vanuatu as they will need more Vatu in exchange for foreign currencies while it benefits the Vanuatu's exporters and institutions that have investments abroad

CHRONOLOGY OF MAJOR EVENTS

No.	BRIEF DESCRIPTION OF MAJOR EVENTS	EFFECTIVE DATE
1.	Port Vila required over VT29 billion and two years to rebuild after a devastating earthquake that caused deaths, injuries, and extensive damage across housing, infrastructure, and public services, with the government seeking donor support through a National Recovery Plan. Vanuatu Daily Post	7 January 2025
2.	Following the December 17, 2024, 7.3 magnitude earthquake, the Vanuatu Red Cross Society assessed significant damage to Efate's school infrastructure—109 classrooms, 11 ablution blocks, and 18 water tanks—with an estimated VT 3 million in repairs needed for 24 critical buildings serving 12,000 students, while temporary learning spaces, shift systems, and e-learning initiatives are being implemented to ensure continued education and safety amid recovery efforts. Vanuatu Daily Post	17 January 2025
3.	Businesses in Port Vila's CBD affected by the earthquake has received relief from penalties on late business licence and VAT payments in January 2025, with dedicated support, flexible deadlines, and a recovery plan underway to aid their resilience and cash flow. Vanuatu Daily Post	25 January 2025
4.	The Vanuatu Chamber of Commerce and Industry has supported the government by providing clear, multilingual information on the processes building owners must follow to obtain reoccupancy certificates for Port Vila's CBD, prioritizing safety assessments and coordinated zone openings to aid a swift, safe recovery for businesses and communities. Vanuatu Daily Post	28 January 2025
5.	Vanuatu's 52 elected MPs began their 14th Legislature by taking oaths, electing the Speaker and Prime Minister amid political competition, with new amendments enhancing transparency in party affiliations and marking a significant step in the nation's governance and leadership. Vanuatu Daily Post	11 February 2025
6	. The December 2024 earthquake worsened job losses and the economic downturn, making swift action crucial. The Vanuatu Chamber of Commerce and Industry outlines six priority initiatives aimed at stimulating the economy and delivering short- to mid-term benefits. 1. Employment and Small Business Stimulus 2. Business recovery post-earthquake: 3. Broadening duty relief categories: 3. Land tenure stability – 4. Tourism Revenue 5. Ease of doing business 6. Encouraging more Ni-anuatu entrepreneurship and business success Vanuatu Daily Post	12 February 2025
7.	The Vanuatu government through the Council of Ministers, endorsed a VT2.26 billion stimulus package. The stimulus package aimed to support post-earthquake economic recovery by funding wage subsidies, demolition of unsafe buildings, tourism promotion, micro-business grants, loan guarantees, school subsidies, and potential VAT exemptions.. Vanuatu Daily Post	21 February 2025

No.	BRIEF DESCRIPTION OF MAJOR EVENTS	EFFECTIVE DATE
8.	<p>The Japanese government, through Ambassador Naohisa Okuda, pledged to support Vanuatu's recovery by sharing disaster prevention expertise and strengthening cooperation on sustainable development, climate change, and major infrastructure projects, highlighting the close ties and shared values between the two island nations.</p> <p>This event marks a hopeful milestone in Vanuatu's economic recovery and deepening friendship with Japan, whose steadfast support in development and disaster relief has been vital to the nation's resilience and future progress.</p> <p>Vanuatu Daily Post</p>	26 February 2025
9.	<p>Vanuatu has planted over 800,000 coconut trees so far, supported by government and European funding, as part of a national strategy to combat the Coconut Rhinoceros Beetle and rejuvenate the industry with resilient varieties, while overcoming logistical challenges to reach a goal of one million trees.</p> <p>Vanuatu Daily Post</p>	27 February 2025
10.	<p>The European Union has pledged €250,000 to support Pacific Island Forum Fishery Agency members in boosting economic returns from tuna fisheries through value-adding, inclusive investment strategies, and regional cooperation aligned with the 2050 Strategy for the Blue Pacific Continent and SDG14 goals..</p> <p>Vanuatu Daily Post</p>	28 February 2025
11.	<p>Australia has pledged an additional AUD 5 million (VT393 million) to support Vanuatu's earthquake recovery, bringing total aid to VT1.7 billion, as both nations celebrate 25 years of strong diplomatic ties and commit to deepening cooperation in development, infrastructure, and security.</p> <p>Vanuatu Daily Post</p>	28 February 2025
12.	<p>As part of its 100-day economic recovery plan, the Vanuatu government aims to end the fuel monopoly, reduce prices by introducing a new fuel company, revive stalled fuel depot efforts with TotalEnergies Fiji, review price control laws, boost tourism through targeted campaigns, and roll out a stimulus package to support short-term recovery and community resilience.</p> <p>Vanuatu Daily Post</p>	13 March 2025
13.	<p>PACIFIC TRADE INVEST (PTI) Australia is expanding its Digital Tourism Program in Vanuatu by adding ten new operators to support the government's earthquake recovery efforts, boosting the local tourism economy through enhanced digital presence and direct online bookings.</p> <p>Vanuatu Daily Post</p>	13 March 2025
14.	<p>The Asian Development Bank launched its Frontier Seed (Pacific) program to fund and support local businesses like Fiji's SeaPAC and Kahuto Pacific, aiming to foster sustainable growth, develop local industries, and attract investment in Pacific frontier markets.</p> <p>Vanuatu Daily Post</p>	14 March 2025
15.	<p>As the Australia Pacific Training Coalition (APTC) concludes its vocational training in Vanuatu after training over 3,500 Ni-Vanuatu graduates since 2007, the new Pacific Australia Skills Platform will take over, continuing to support workforce development with a renewed focus on Vanuatu's labor market needs.</p> <p>Vanuatu Daily Post</p>	15 March 2025
16.	<p>ANZ has secured a 10-year, AUD\$2 billion guarantee from the Australian Government to strengthen its long-standing banking services and digital investments across the Pacific, supporting economic development, fee-free international transfers, and financial literacy programs in the region.</p> <p>Vanuatu Daily Post</p>	15 March 2025

No.	BRIEF DESCRIPTION OF MAJOR EVENTS	EFFECTIVE DATE
17.	<p>France and Vanuatu share strong bilateral ties, with France seeking to deepen regional cooperation through cultural preservation, audiovisual projects, political support, and joint efforts to combat illegal fishing, all aimed at supporting regional stability.</p> <p>France maintains naval patrols in the Pacific, including Vanuatu's waters, collaborates with Vanuatu to combat illegal fishing, supports regional training and programs, and has appointed its first dedicated regional ambassador to strengthen Pacific cooperation and expand engagement with Vanuatu. Vanuatu Daily Post</p>	18 March 2025
18.	<p>SunRice has appointed Tove Eats Ltd as its main distributor across six Vanuatu provinces (excluding Port Vila and Santo), breaking a longtime monopoly to boost competition, food security, local brand presence, and economic growth while providing affordable, high-quality rice to more communities.</p> <p>Tove Eats Ltd is revitalizing SunRice distribution across northern provinces with new offices, regional partnerships, and competitive pricing to ensure wider access to premium-quality rice, strengthen food security, and offer cost-effective, flexible purchasing options starting April 2025.</p> <p>Vanuatu Daily Post</p>	18 March 2025
19	<p>The Prime Minister has ordered a review of the Capital Investment Immigration Plan's fund management after political instability and poor oversight led to agent mismanagement, causing suspension of Vanuatu's EU visa-free agreement and potential US travel restrictions.</p> <p>The EU highlighted serious flaws in Vanuatu's citizenship program, including weak due diligence and oversight, while the Citizenship Commission acknowledged past mismanagement but emphasized that granting citizenship to migrants has long been a common practice contributing to national development globally.</p> <p>The Vanuatu Economic Recovery Programme (VERP) and its successor DSP raised vital government funds post-Cyclone Pam, with citizenship programmes initially maintaining strict integrity but later compromised by political instability, leading to major flaws and the recent suspension of CIIP programmes initiated in 2023.</p> <p>Vanuatu Daily Post</p>	22 March 2025
20	<p>The 2025 Budget Appropriation, finalized amid economic challenges from Air Vanuatu's liquidation and last year's earthquake, reflects a reduced GDP growth forecast and government revenue, with a focus on recovery efforts and fiscal sustainability through a smaller VT49.8 billion appropriation and an overall budget decrease to VT68 billion.</p> <p>Vanuatu Daily Post</p>	25 March 2025
